## NUMBER OF INHABITANTS

**Population of the State.**—The Territory of New Mexico was organized in 1850 from the area now comprising the greater parts of the States of New Mexico and Arizona, together with small portions of Colorado and Nevada. In 1863, with the organization of the Arizona Territory, the boundaries of New Mexico were established as at present. In 1912, New Mexico was admitted to the Union as the forty-seventh State. Its population on April 1, 1940, according to the Sixteenth Census, was 531,818, which represents an increase of 108,501, or 25.6 percent, as compared with the population on April 1, 1930. The total land area of the State, as shown in table 3, is 121,511 square miles. The average number of inhabitants per square mile in 1940 was 4.4, as compared with 3.5 in 1930.

Table 1 shows the population of New Mexico from

1850, the year in which the Territory of New Mexico was first separately enumerated, to 1940, together with the increase or decrease during each decade. The urban and rural population of the State at each census is presented in this table and is also shown graphically in the accompanying chart. The urban population of New Mexico consists of those persons living in incorporated places of 2,500 or more, the remainder of the population being classified as rural. The urban and rural areas are not necessarily constant from one census to the next, since new places are added to the urban list from time to time as they attain a population of 2,500 or more; for example, Hobbs was classified as urban in 1940 for the first time. Places are likewise taken off the urban list when, through decline in population, they fall below this limit.

<sup>1</sup> Total for 1860 is exclusive of population of area taken to form part of Colorado Territory in 1861, but includes population of area organized as part of the Territory of Arizona in 1863. No estimate of population in 1850 is available for territory acquired from Mexico through the Gadsden Purchase (1853), annexed to New Mexico in 1854.

URBAN AND RURAL POPULATION OF NEW MEXICO: 1850 TO 1940

**Geographic subdivisions.**—In tables 2 to 5 the population of New Mexico is shown by counties, election precincts, cities, towns, and villages, with some comparative figures from previous censuses. Table 6 gives the population of incorporated places by wards.

**Cities of 10,000 or more.**—There are five cities in the State that had a population of 10,000 or more in 1940. Table 2 shows the population of these cities at each census for which figures are available, together with the increase or decrease during each decade. Albuquerque, the largest city, had a population in 1940 of 35,449; and Santa Fe, the capital of the State, had a population of 20,325.

TABLE 2.—POPULATION OF CITIES OF 10,000 OR MORE FROM EARLIEST CENSUS TO 1940

[A minus sign (-) denotes decrease]

Table with columns: CITY AND CENSUS YEAR, Population, INCREASE OVER PRECEDING CENSUS (Number, Percent), CITY AND CENSUS YEAR, Population, INCREASE OVER PRECEDING CENSUS (Number, Percent). Rows include Albuquerque, Clovis, and Hobbs with data for years 1940, 1930, 1920, 1910, 1900, 1890.

<sup>1</sup> Estimated.

Counties.—Table 3 shows the population of the 31 counties of New Mexico from 1920 to 1940, together with the land area of each county and its population

per square mile in 1940. The land areas given here are the result of new measurements recently compiled and differ somewhat from those published in earlier census reports. Twenty-seven of these counties increased in population between 1930 and 1940, and four decreased. No new counties have been organized, and there have been no changes in county boundaries since the census of 1930. This table also presents the urban and rural population of each county for 1940 and 1930.

Minor civil divisions.—To the primary political divisions into which the counties are subdivided the Census Bureau applies the general term "minor civil divisions." The primary divisions of the counties in New Mexico are called election precincts. (In Rio Arriba and San Juan Counties, there are Indian reservations that are separate from the election precincts.) The incorporated cities, towns, and villages form secondary subdivisions of the minor civil divisions in which they are located. There are 12 cities, 16 towns, and 35 villages. Ordinarily, each of these secondary divisions forms a part of some election precinct (or precincts).

TABLE 3.—AREA AND POPULATION OF COUNTIES, URBAN AND RURAL: 1920 TO 1940

[A minus sign (-) denotes decrease. Percent not shown where base is less than 100]

Large table with columns: COUNTY, Land area in square miles, 1940, 1940 (Total, Per square mile), TOTAL POPULATION (1930, 1920, Percent of increase), URBAN POPULATION (1940, 1930, Percent of increase), RURAL POPULATION (1940, 1930, Percent of increase), PERCENT URBAN (1940, 1930). Rows list 31 counties including New Mexico and various county names.

<sup>1</sup> Catron organized from part of Socorro in 1921.

<sup>2</sup> Harding organized from parts of Mora and Union in 1921.

<sup>29</sup> TORRANCE.—County totals for 1930 and 1920 include population (711 in 1930; 1,024 in 1920) of precinct 7, Estancia, parts taken to form 7A, and 7B, Estancia, and population (1,338 in 1930; 852 in 1920) of precinct 15, Mountainair, parts taken to form 15A and 15B, Mountainair, in 1936. Part of precinct 8 annexed to 5; part of precinct 12 annexed to 24; and precinct 25 organized from parts of 9, 12, 14, 16, and 24, in 1936. Precinct 26 organized in 1937 from part of 21. Encino village incorporated in 1935.

<sup>30</sup> UNION.—County redistricted in 1938; comparative figures shown wherever possible. Total for 1920 includes population (2,409) of precincts taken to form part of Harding County in 1921. Precinct 2 returned in 1930 as Cimarron, and Folsom village not returned separately.

<sup>31</sup> VALENCIA.—County total for 1930 includes population (210) of precinct 25, Scholle, annexed to 13 since 1930; total for 1920 includes population (380) of old precinct 15, annexed to 17 in 1928. Precinct 15, San Rafael, organized in 1929 from part of 17, but not returned separately in 1930. New precinct 25 organized in 1931 from parts of 14 and 24, and precinct 28 organized from part of 24. Precinct 21 returned in 1930 as Trujillos, and precinct 28, as El Bosque.

Incorporated places.—Table 5 shows the population in 1940 and 1930 of the incorporated places (cities, towns, and villages) in New Mexico. In this table the places are arranged in alphabetical order, each followed

by the name of the county in which it is located. In table 6, the population of the incorporated places of 5,000 or more that are subdivided into wards is shown by wards.

## NUMBER OF INHABITANTS

**Population of the State.**—New York was one of the Thirteen Original States. In 1853, with the annexation of a small area from Massachusetts, New York assumed its present boundaries. Its population on April 1, 1940, according to the Sixteenth Census, was 13,479,142, which represents an increase of 891,076, or 7.1 percent, as compared with the population on April 1, 1930. The total land area of the State, as shown in table 3, is 47,929 square miles. The average number of inhabitants per square mile in 1940 was 281.2, as compared with 262.6 in 1930.

Table 1 shows the population of New York from 1790, the year of the first Federal census, to 1940, together with the increase during each decade. The urban and rural population of the State at each census is presented in this table and is also shown graphically in the accom-

panying chart. The urban population of New York, as defined by the Census Bureau, consists mainly of those persons living in incorporated places of 2,500 or more. It also includes the population of one town<sup>1</sup> (not incorporated as a municipality nor containing any areas so incorporated) that had a total population of more than 10,000 and a population density of more than 1,000 per square mile. The remainder of the population is classified as rural. The urban and rural areas are not necessarily constant from one census to the next, since new places are added to the urban list from time to time as they meet the requirements. Places are likewise taken off the urban list when, through decline in population, they no longer meet the requirements. For example, Sidney qualified as urban in 1920 and 1940 but not in 1930.

URBAN AND RURAL POPULATION OF NEW YORK: 1790 TO 1940

**Geographic subdivisions.**—In tables 2 to 5 the population of New York is shown by counties, towns, cities, and villages, with some comparative figures from previous censuses. Table 6 gives the population of incorporated places by wards or assembly districts. Data for the metropolitan districts are presented in tables 7 to 7-F and data for the census tracts of the tracted cities in tables 8 to 8-H.

**Incorporated places of 10,000 or more.**—There are 70 incorporated places in the State that had a population of 10,000 or more in 1940. Table 2 shows the population of these incorporated places at each census for which figures are available, together with the increase or decrease during each decade. New York City, the largest city, had a population in 1940 of 7,454,995; and Albany, the capital of the State, had a population of 130,577. The population from 1790 to 1940 of New York City and its five boroughs as now constituted is presented separately in table 2-A.

Counties.—Table 3 shows the population of the 62 counties of New York from 1920 to 1940, together with the land area of each county and its population per square mile in 1940. The land areas given here are the result of new measurements recently compiled and differ somewhat from those published in earlier census reports. Of the 60 counties whose boundaries remained unchanged since 1930, 47 increased in population between 1930 and 1940, and 13 decreased. Part of Queens County was annexed to Kings County and part of Kings County was annexed to Queens County in 1931. This table also presents the urban and rural population of each county for 1940 and 1930.

Parts of Mount Pleasant town annexed to Pleasantville village in 1932 and 1935. Peekskill village incorporated as a city and made independent of Cortlandt town in 1940.

29 YATES.—Penn Yan village, geographically located in Benton, Jerusalem, and Milo towns, had no population in 1940 for that part in Jerusalem town; returned in 1930 and 1920 as in Benton and Milo towns only.

Incorporated and urban places.—Table 5 shows the population in 1940 and 1930 of the incorporated places (cities and villages) and of the one urban town in New York. In this table the places are arranged in alphabetical order, each followed by the name of the

county or counties in which it is located. In table 6 the population of the incorporated places of 5,000 or more that are subdivided into wards is shown by wards, except for New York City, which is shown by assembly districts.

**Metropolitan districts.**—Metropolitan districts have been set up for use in the 1940 Census of Population in connection with each city of 50,000 or more, two or more such cities sometimes being in one district. The general plan is to include in the district, in addition to the central city or cities, all adjacent and contiguous minor civil divisions or incorporated places having a population of 150 or more per square mile. In some metropolitan districts a few less densely populated contiguous divisions are included on the basis of special qualifications. A metropolitan district is thus not a political unit but rather an area including all the thickly

settled territory in and around a city or group of cities. It tends to be a more or less integrated area with common economic, social, and, often, administrative interests.

Table 7 shows the population of the Albany-Schenectady-Troy metropolitan district and its constituent political units in 1940 and 1930, together with the increase or decrease during the decade. The Albany-Schenectady-Troy metropolitan district had 431,575 inhabitants in 1940, as compared with 425,259 in 1930. The metropolitan district in 1940 had exactly the same area as in 1930.

Table 7-C shows the population of the New York-Northeastern New Jersey metropolitan district and its constituent political units in 1940 and 1930, together with the increase or decrease during the decade. Like several others, this district occupies territory in more than one State. In 1940 the New York-Northeastern New Jersey metropolitan district had 11,690,520 inhabitants, while in 1930 the district as then constituted had a population of 10,901,424. Stony Point town, in Rockland County, New York; Watchung borough and Green Brook township, in Somerset County, New Jersey; and that part of Wall township, Monmouth County, New Jersey, that was annexed to Belmar borough, were included in the metropolitan district in 1940 for the first time. Since the population of the last mentioned was not separately determined in 1940 or 1930, the combined population of these new areas is not obtainable for either 1940 or 1930.

Census tracts.—Census tracts are small areas into which certain large cities have been subdivided for statistical and local administrative purposes, through cooperation with a local committee in each case. Through the use of census tract data comparisons may be made from census to census. Tracts are laid out with a view to approximate uniformity in population and with some regard for uniformity in area, and each is designed to include an area fairly homogeneous in population characteristics. In table 8 the 1940 and 1930 population of Buffalo is shown by census tracts.

Table 8-A presents the 1940 population of Rochester by census tracts. Since these tracts were not established until after 1930, there are no comparative figures for earlier censuses. The 1940 population by census tracts is shown in tables 8-B and 8-C for Syracuse and Yonkers, respectively, and in tables 8-D to 8-H for the five boroughs of New York City. Comparative figures for 1930 are not shown because of extensive revision of tract boundaries since 1930. The tracted areas for these five cities are shown on the accompanying maps.

Census tracts were first used in New York City in connection with the census of 1910. At that time the city was divided into 708 tracts. In 1920 the number of tracts was greatly increased. At present there are 3,343 census tracts in New York City distributed among the five boroughs as follows: Bronx, 493; Brooklyn, 925; Manhattan, 279; Queens, 1,334; and Richmond, 312.

The 1940 population of New York City and each of the boroughs was as follows:

The City.....	7,454,995
Bronx Borough.....	1,394,711
Brooklyn Borough.....	2,698,285
Manhattan Borough.....	1,889,924
Queens Borough.....	1,297,634
Richmond Borough.....	174,441

Tables 8-D to 8-H show the population in each borough by census tracts. The accompanying maps show the census tracts grouped into Health Areas.

## NUMBER OF INHABITANTS

**Population of the State.**—North Carolina was one of the Thirteen Original States. Its population on April 1, 1940, according to the Sixteenth Census, was 3,571,623, which represents an increase of 401,347, or 12.7 percent, as compared with the population on April 1, 1930. The total land area of the State, as shown in table 3, is 49,142 square miles. The average number of inhabitants per square mile in 1940 was 72.7, as compared with 64.5 in 1930.

Table 1 shows the population of North Carolina from 1790, the year of the first Federal census, to 1940, together with the increase during each decade. The urban and rural population of the State at each census

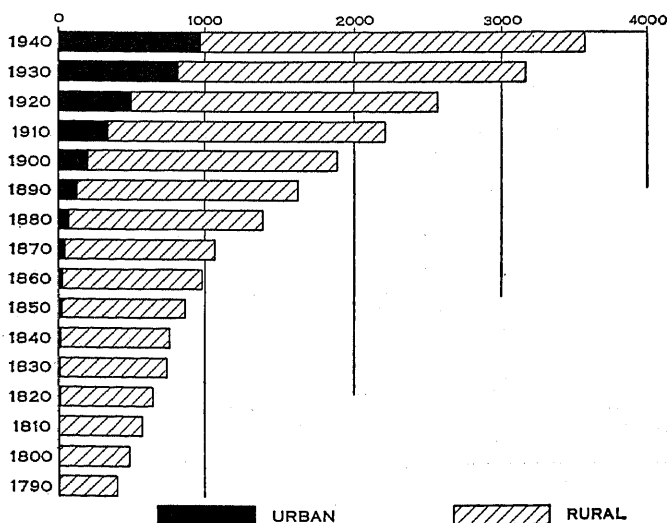

is presented in this table and is also shown graphically in the accompanying chart. The urban population of North Carolina consists of all persons living in incorporated places of 2,500 or more, the remainder of the population being classified as rural. The urban and rural areas are not necessarily constant from one census to the next, since new places are added to the urban list from time to time as they attain a population of 2,500 or more; for example, Brevard was classified as urban in 1940 for the first time. Places are likewise taken off the urban list when, through decline in population, they fall below this limit; for example, Belhaven was removed from the urban list in 1920.

URBAN AND RURAL POPULATION OF NORTH CAROLINA: 1790 TO 1940  
THOUSANDS

**Geographic subdivisions.**—In tables 2 to 5 the population of North Carolina is shown by counties, townships, cities, towns, and villages, with some comparative figures from previous censuses. Table 6 gives the population of incorporated places by wards, and tables 7 to 7-D present data for the metropolitan districts.

**Incorporated places of 10,000 or more.**—There are 26 incorporated places (cities and towns) in the State that had a population of 10,000 or more in 1940. Table 2 shows the population of these incorporated places at each census for which figures are available, together with the increase or decrease during each decade. Charlotte, the largest city, had a population in 1940 of 100,899; and Raleigh, the capital of the State, had a population of 46,897.

Counties.—Table 3 shows the population of the 100 counties of North Carolina from 1920 to 1940, together with the land area of each county and its population per square mile in 1940. The land areas given here are the result of new measurements recently compiled and differ somewhat from those published in earlier census

reports. Ninety-one of these counties increased in population between 1930 and 1940, and nine decreased. No new counties have been organized, and there have been no changes in county boundaries since the census of 1930. This table also presents the urban and rural population of each county for 1940 and 1930.

**Minor civil divisions.**—To the primary political divisions into which the counties are subdivided the Census Bureau applies the general term "minor civil divisions." The primary divisions of the counties in North Carolina are called townships. The incorporated cities, towns, and villages form secondary subdivisions of the minor civil divisions in which they are located. There are 33 cities, 450 towns, and 5 villages. Ordinarily, each of these secondary divisions, or incorporated places, forms a part of some township (or townships).

Table 4 shows the population of each county by townships, cities, towns, and villages for the last three censuses. The population of the cities, towns, and villages is shown in *italics* under the population of the primary divisions in which the places are respectively located. Where an incorporated place is located in two or more townships in the same county, the total population of the place is given in connection with the presentation for the first township. Where the place is situated in two or more counties, the total population is given in connection with each county.

TABLE 4.—POPULATION OF COUNTIES BY MINOR CIVIL DIVISIONS: 1920 TO 1940

[For changes in boundaries, etc., between 1930 and 1940, see footnotes; for those between 1920 and 1930, see Reports of the Fifteenth Census (1930), vol. I, pp. 784-798]

Table with 14 columns: County, Minor Civil Division, 1940, 1930, 1920. Includes data for Alamance, Alexander, Alleghany, Anson, Ashe, Avery, Beaufort, Buncombe, Burke, Cabarrus, Caldwell, Bladen, Brunswick, and Watauga counties.

1 ALLEGHANY.—Roaring Gap town not returned separately in 1930.

2 ASHE.—Part of Peak Creek township annexed to Chestnut Hill in 1932. Warrensville town incorporated in 1931. Hurricane township returned in 1930 as Hurricane, and Todd town as in Ashe County only.

3 BEAUFORT.—Part of Washington township annexed to Washington city in 1939. The figure for Long Acre township for 1930 has been corrected to include population (193) of Washington Park town, erroneously returned as in Washington township.

4 BERTIE.—Bertie town, in Windsor township, incorporated in 1939; not returned separately in 1940.

5 BUNCOMBE.—County total for 1920 is exclusive of population (877) of Broad River township, annexed from McDowell County in 1925. Part of Asheville city reverted to Asheville township in 1933, and part of Asheville township, comprising part of Asheville city, annexed to Biltmore Forest town in 1935.

6 CALDWELL.—Blowing Rock town, geographically located in Globe, Mulberry, and Patterson townships, and in Watauga County; no population reported in 1940 for those parts in Mulberry and Patterson; returned in 1930 and 1920 as in Watauga County only.

<sup>21</sup> WATAUGA.—Todd town returned in 1930 and 1920 as in Ashe County only, and Blowing Rock town as in Watauga County only.  
<sup>22</sup> WILSON.—Part of Wilson township annexed to Wilson town, and part of Wilson town, reverted to Wilson township, in 1938. Saratoga town incorporated in 1939.  
<sup>23</sup> YADKIN.—County total for 1920 includes population (447) of Little Yadkin township, annexed to Forsyth County in 1927. Arlington town incorporated in 1930. Subsequent to the tabulations, information was received that 708 people living in East Bend township outside East Bend town had been erroneously accredited to the town. The correct 1940 population of East Bend town is 494.

Incorporated places.—Table 5 shows the population in 1940 and 1930 of the incorporated places (cities, towns, and villages) in North Carolina. In this table the places are arranged in alphabetical order, each fol-

lowed by the name of the county (or counties) in which the place is located. In table 6, the population of the incorporated places of 5,000 or more that are subdivided into wards is shown by wards.

**Metropolitan districts.**—Metropolitan districts have been set up for use in the 1940 Census of Population in connection with each city of 50,000 or more, two or more such cities sometimes being in one district. The general plan is to include in the district, in addition to the central city or cities, all adjacent and contiguous minor civil divisions or incorporated places having a population of 150 or more per square mile. In some metropolitan districts, a few less densely populated contiguous divisions are included on the basis of special qualifications.

A metropolitan district is thus not a political unit, but rather an area including all the thickly settled territory

in and around a city or group of cities. It tends to be a more or less integrated area with common economic, social, and, often, administrative interests.

All of the metropolitan districts in North Carolina were defined for the first time in 1940. In each case, for comparison, the 1930 population of the units comprising the present district is also shown, together with the increase between 1930 and 1940.

Table 7 shows the population of the Asheville metropolitan district and its constituent political units in 1940. In 1940 the Asheville metropolitan district had 76,324 inhabitants, whereas in 1930 the same area had a population of 70,537.

## NUMBER OF INHABITANTS

**Population of the State.**—North Dakota was organized as a State from a part of Dakota Territory, and was admitted to the Union in 1889. Its population on April 1, 1940, according to the Sixteenth Census, was 641,935, which represents a decrease of 38,910, or 5.7 percent, as compared with the population on April 1, 1930. The total land area of the State, as shown in table 3, is 70,054 square miles. The average number of inhabitants per square mile in 1940 was 9.2, as compared with 9.7 in 1930.

Table 1 shows the population of North Dakota from 1870, the year in which the Dakota Territory was first enumerated by areas that can be grouped to produce the present State area, to 1940, together with the increase or decrease during each decade. The urban and rural population of the State at each census is presented in this table and is also shown graphically in the accompanying chart. The urban population of North Dakota consists of those persons living in incorporated places of 2,500 or more, the remainder of the population

being classified as rural. The urban and rural areas are not necessarily constant from one census to the next, since new places are added to the urban list from time to time as they attain a population of 2,500 or more; for example, Grafton was classified as urban in 1920 for the first time. Places are likewise taken off the urban list when, through decline in population, they fall below this limit.

<sup>1</sup> Population of that part of Dakota Territory which now constitutes North Dakota.

**Geographic subdivisions.**—In tables 2 to 5 the population of North Dakota is shown by counties, townships, cities, towns, and villages, with some comparative figures from previous censuses. Table 6 gives the population of cities by wards.

**Cities of 10,000 or more.**—There are four cities in the State that had a population of 10,000 or more in 1940. Table 2 shows the population of these cities at each census for which figures are available, together with the increase during each decade. Fargo, the largest city, had a population in 1940 of 32,580; and Bismarck, the capital of the State, had a population of 15,496.

**Counties.**—Table 3 shows the population of the 53 counties of North Dakota from 1920 to 1940, together with the land area of each county and its population per square mile in 1940. The land areas given here are the result of new measurements recently compiled and differ somewhat from those published in earlier census reports. Ten of the counties increased in population between 1930 and 1940, and 43 decreased. No new counties have been organized, and there have been no changes in county boundaries since the census of 1930. This table also presents the urban and rural population of each county for 1940 and 1930.

Minor civil divisions.—To the primary political divisions into which the counties are subdivided the Census Bureau applies the general term "minor civil divisions." The primary divisions of the counties in North Dakota are the townships, cities, villages, and one town. The Fort Berthold Indian Reservation is also classified as a primary division. There are 111 cities, 221 villages,

and 1 town (Forman). Since all the incorporated places are primary divisions of the counties, there are no secondary divisions. Where the place is located in two or more counties, the total population is given in connection with each county.

Table 4 shows the population of each county by townships, cities, towns, and villages for the last three censuses.

TABLE 4.—POPULATION OF COUNTIES BY MINOR CIVIL DIVISIONS: 1920 TO 1940

[Areas in which no population has been reported at any of the last three censuses are not shown. Counties showing totals for 1920 but few comparative figures for minor civil divisions were redistributed between 1920 and 1930. For changes in boundaries, etc., between 1930 and 1940, see footnotes; for those between 1920 and 1930, see Reports of the Fifteenth Census (1930), vol. I, pp. 810-829]
