URBANIZED AREA MAPS

The five urbanized areas located in Florida, for which statistics are shown in table 9, are depicted in the following maps. The shaded areas, in combination, comprise the urbanized areas. To assist in locating the exact external boundaries of the areas, each

boundary feature (street segment, political boundary, or other) has been assigned a number. The boundary segments thus numbered are shown on the map and the features to which they apply are presented in the following key.

URBANIZED AREA MAPS

The five urbanized areas having their central cities in Georgia, for which statistics are shown in table 9, are depicted in the following maps. The shaded areas, in combination, comprise the urbanized areas. To assist in locating the exact external bound-

aries of the areas, each boundary feature (street segment, political boundary, or other) has been assigned a number. The boundary segments thus numbered are shown on the map and the features to which they apply are presented in the following key.

¹ According to the new urban definition, the urban population comprises persons residing in urban territory but not necessarily in an urban place, which is defined as an incorporated place of 2,500 or more, or an unincorporated place of 2,500 or more located outside an urbanized area. Under the old definition, incorporated places of 2,500 or more and places urban under special rule are classified as urban places. In Idaho, there were no places urban under special rule.

Table 6.—POPULATION OF COUNTIES BY MINOR CIVIL DIVISIONS: 1930 TO 1950

"Uninc." designates an unincorporated place. "Precincts" shown here are election precincts. Minor civil division figures for 1940 and 1950 do not necessarily add to the county totals. Figures for 1940 and 1950 are not available for unincorporated places and places incorporated subsequent to Apr. 1, 1940. Boundary changes between 1940 and 1950 given in footnotes; for changes between 1930 and 1940, see reports of the 16th Census (1940), *Population*, Vol. I, pp. 279-285. Total population of a place located within 2 or more minor civil divisions appears in table 7.

Under the old definition, incorporated places of 2,500 or more and places urban under special rule are classified as urban places. There were no places urban under special rule in Illinois.

² Includes 220,886 persons in urban territory outside of urban places.

³ Population of Illinois Territory, which comprised the area now constituting the State of Illinois, almost all of Wisconsin, the western part of the Upper Peninsula of Michigan, and the northeastern part of Minnesota.

¹ According to the new urban definition, the urban population comprises persons residing in urban territory but not necessarily in an urban place, which is defined as an incorporated place of 2,500 or more, or an unincorporated place of 2,500 or more located outside an urbanized area. Under the old definition, incorporated places of 2,500 or more and places urban under special rule are classified as urban places. There were no places urban under special rule in Indiana.

² Includes 123,965 persons in urban territory outside of urban places.

³ Includes population of area separated in 1816 and transferred to Michigan Territory in 1818.

⁴ Includes population (3,124) of those portions of Indiana Territory which were taken to form Michigan and Illinois Territories in 1805 and 1809, respectively, and of that portion which was separated in 1816 and transferred to Michigan Territory in 1818.
