U.S. DEPARTMENT OF COMMERCE / Bureau of the Census

PC(V1)-28

MONTANA

advance report

Final Population Counts

(The figures in this report supersede the preliminary counts for the same areas published in the PC(P1), PC(P2), and PC(P3) series of reports. The present series consists of 52 reports—number 1 for the United States and numbers 2 through 52 for the States and the District of Columbia in alphabetical order rather than in order of publication.)

The official population count of the State as of April 1, 1970, was 694,409. This represents an increase of 19,642, or 2.9 percent, from the 674,767 inhabitants of the State in 1960.

This report presents final 1970 census statistics on the number of inhabitants of the State and its counties, classified by urban and rural residence. In addition, figures are shown for each county subdivision, each incorporated place, and each unincorporated place of 1,000 or more.

The figures presented here are being issued in advance of their publication in Final Report Series PC(1)-A. The final report for this State will be issued within the next few months.

An outline of the 1970 census publication program can be obtained free of charge from the Bureau of the Census, Washington, D.C. 20233 or any U.S. Department of Commerce Field Office.

Urban and rural residence.—According to the definition adopted for use in the 1970 census, the urban population comprises all persons living in urbanized areas and in places of 2,500 inhabitants or more outside urbanized areas. More specifically, the urban population consists of all persons living in (a) places of 2,500 inhabitants or more incorporated as cities, villages, boroughs (except in Alaska), and towns (except in the New England States, New York, and Wisconsin), but excluding those persons living in the rural portions of extended cities (see "Urbanized areas," below); (b) unincorporated places of 2,500 inhabitants or more; and (c) other territory, incorporated or unincorporated, included in urbanized areas. The population not classified as urban constitutes the rural population.

Urbanized areas.—An urbanized area generally contains at least one city of 50,000 inhabitants or more and includes that portion of the surrounding territory, whether incorporated or unincorporated, which meets specified criteria relating to population density. There are a few urbanized areas which are based on "twin central cities" that have a combined population of at least 50,000. Some urbanized areas contain one or more incorporated places designated as "extended cities." These places are so designated because they have one or more large portions (normally at the boundary of the city) with relatively low population density. These portions are classified as rural and the residents are not included in the population of the urbanized area.

County subdivisions.—The Census Bureau presents statistics for subdivisions of counties, as follows:

- (a) By minor civil divisions in 28 States—Arkansas, Connecticut, Illinois, Indiana, Iowa, Kansas, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Nebraska, Nevada, New Hampshire, New Jersey, New York, North Carolina, Ohio, Pennsylvania, Rhode Island, South Dakota, Vermont, Virginia, West Virginia, and Wisconsin.
- (b) By census county divisions in 21 States—Alabama, Arizona, California, Colorado, Delaware, Florida, Georgia, Hawaii, Idaho, Kentucky, Montana, New Mexico, North Dakota, Oklahoma, Oregon, South Carolina, Tennessee, Texas, Utah, Washington, and Wyoming.
- (c) In Alaska, by boroughs and reservations for those census divisions (the county equivalent) which are so subdivided.

Minor civil divisions (townships, districts, etc.) are the primary political divisions into which counties are

subdivided. In some States, incorporated places are minor civil divisions in their own right. In other States they are subordinate to the minor civil division in which they are located, or the pattern is mixed—some incorporated places are independent minor civil divisions and others are subordinate to the minor civil division.

Census county divisions represent community areas which have been defined in recent decades by the Census Bureau with the cooperation of the Governors and State and local officials. These areas have physical features (roads, streams, etc.) as boundaries or follow the limits of incorporated places. The census county divisions in these States have replaced a variety of minor civil divisions which were unsatisfactory for statistical purposes principally because their boundaries frequently changed, were imaginary lines, or were not well known by many of the inhabitants.

Incorporated places.—Political units recognized as incorporated places in the reports of the census are those which are incorporated as cities, boroughs, towns, and villages, with the following exceptions: (a) boroughs in Alaska, and (b) towns in the New England States, New York, and Wisconsin. For extended cities (see "Urbanized areas" above), the data in table 2 refer to all of the population residing within the corporate limits of the city. For these cities, table 3 shows the urban and rural parts separately; comparable 1960 data are not available because this concept was not used prior to 1970.

Unincorporated places.—As in the 1950 and 1960 censuses, the Bureau has delineated boundaries for closely settled population centers without corporate limits. All such places of 1,000 inhabitants or more are shown in tables 2 and 3, and are identified with the letter "U."

Boundary changes.—The boundaries of some of the areas shown in this report may have changed between 1960 and 1970. The 1960 figures given here have generally not been adjusted for such changes. Specific information on the changes will be presented in the Series PC(1)-A final report for this State.

Percents and symbols.—Percents which round to less than 0.1 are shown as zero. A dash "-" signifies zero. Three dots "..." mean not applicable. Minus sign preceding a figure denotes decrease. The symbol "NA" means not available, and "U" means that the place is unincorporated. In table 3, an asterisk "*" denotes an incorporated place under 2,500 located in an urbanized area.

Table 1. Population of Counties: 1970 and 1960

1970 CENSUS OF POPULATION

September 1970

U.S. DEPARTMENT OF COMMERCE / Bureau of the Census

PC(V1)-29

NEBRASKA

advance report

Final Population Counts

(The figures in this report supersede the preliminary counts for the same areas published in the PC(P1), PC(P2), and PC(P3) series of reports. The present series consists of 52 reports—number 1 for the United States and numbers 2 through 52 for the States and the District of Columbia in alphabetical order rather than in order of publication.)

The official population count of the State as of April 1, 1970, was 1,483,791. This represents an increase of 72,461, or 5.1 percent, from the 1,411,330 inhabitants of the State in 1960.

This report presents final 1970 census statistics on the number of inhabitants of the State and its counties, classified by urban and rural residence. In addition, figures are shown for each county subdivision, each incorporated place, and each unincorporated place of 1,000 or more.

The figures presented here are being issued in advance of their publication in Final Report Series PC(1)-A. The final report for this State will be issued within the next few months.

An outline of the 1970 census publication program can be obtained free of charge from the Bureau of the Census, Washington, D.C. 20233 or any U.S. Department of Commerce Field Office.

Urban and rural residence.—According to the definition adopted for use in the 1970 census, the urban population comprises all persons living in urbanized areas and in places of 2,500 inhabitants or more outside urbanized areas. More specifically, the urban population consists of all persons living in (a) places of 2,500 inhabitants or more incorporated as cities, villages, boroughs (except in Alaska), and towns (except in the New England States, New York, and Wisconsin), but excluding those persons living in the rural portions of extended cities (see "Urbanized areas," below); (b) unincorporated places of 2,500 inhabitants or more; and (c) other territory, incorporated or unincorporated, included in urbanized areas. The population not classified as urban constitutes the rural population.

Urbanized areas.—An urbanized area generally contains at least one city of 50,000 inhabitants or more and includes that portion of the surrounding territory, whether incorporated or unincorporated, which meets specified criteria relating to population density. There are a few urbanized areas which are based on "twin central cities" that have a combined population of at least 50,000. Some urbanized areas contain one or more incorporated places designated as "extended cities." These places are so designated because they have one or more large portions (normally at the boundary of the city) with relatively low population density. These portions are classified as rural and the residents are not included in the population of the urbanized area.

County subdivisions.—The Census Bureau presents statistics for subdivisions of counties, as follows:

- (a) By minor civil divisions in 28 States—Arkansas, Connecticut, Illinois, Indiana, Iowa, Kansas, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Nebraska, Nevada, New Hampshire, New Jersey, New York, North Carolina, Ohio, Pennsylvania, Rhode Island, South Dakota, Vermont, Virginia, West Virginia, and Wisconsin.
- (b) By census county divisions in 21 States—Alabama, Arizona, California, Colorado, Delaware, Florida, Georgia, Hawaii, Idaho, Kentucky, Montana, New Mexico, North Dakota, Oklahoma, Oregon, South Carolina, Tennessee, Texas, Utah, Washington, and Wyoming.
- (c) In Alaska, by boroughs and reservations for those census divisions (the county equivalent) which are so subdivided.

Minor civil divisions (townships, districts, etc.) are the primary political divisions into which counties are

subdivided. In some States, incorporated places are minor civil divisions in their own right. In other States they are subordinate to the minor civil division in which they are located, or the pattern is mixed—some incorporated places are independent minor civil divisions and others are subordinate to the minor civil division.

Census county divisions represent community areas which have been defined in recent decades by the Census Bureau with the cooperation of the Governors and State and local officials. These areas have physical features (roads, streams, etc.) as boundaries or follow the limits of incorporated places. The census county divisions in these States have replaced a variety of minor civil divisions which were unsatisfactory for statistical purposes principally because their boundaries frequently changed, were imaginary lines, or were not well known by many of the inhabitants.

Incorporated places.—Political units recognized as incorporated places in the reports of the census are those which are incorporated as cities, boroughs, towns, and villages, with the following exceptions: (a) boroughs in Alaska, and (b) towns in the New England States, New York, and Wisconsin. For extended cities (see "Urbanized areas" above), the data in table 2 refer to all of the population residing within the corporate limits of the city. For these cities, table 3 shows the urban and rural parts separately; comparable 1960 data are not available because this concept was not used prior to 1970.

Unincorporated places.—As in the 1950 and 1960 censuses, the Bureau has delineated boundaries for closely settled population centers without corporate limits. All such places of 1,000 inhabitants or more are shown in tables 2 and 3, and are identified with the letter "U."

Boundary changes.—The boundaries of some of the areas shown in this report may have changed between 1960 and 1970. The 1960 figures given here have generally not been adjusted for such changes. Specific information on the changes will be presented in the Series PC(1)-A final report for this State.

Percents and symbols.—Percents which round to less than 0.1 are shown as zero. A dash "-" signifies zero. Three dots "..." mean not applicable. Minus sign preceding a figure denotes decrease. The symbol "NA" means not available, and "U" means that the place is unincorporated. In table 3, an asterisk "*" denotes an incorporated place under 2,500 located in an urbanized area.

1970 CENSUS OF POPULATION

September 1970

U.S. DEPARTMENT OF COMMERCE / Bureau of the Census

PC(V1)-30

NEVADA

advance report

Final Population Counts

(The figures in this report supersede the preliminary counts for the same areas published in the PC(P1), PC(P2), and PC(P3) series of reports. The present series consists of 52 reports—number 1 for the United States and numbers 2 through 52 for the States and the District of Columbia in alphabetical order rather than in order of publication.)

The official population count of the State as of April 1, 1970, was 488,738. This represents an increase of 203,460, or 71.3 percent, from the 285,278 inhabitants of the State in 1960.

This report presents final 1970 census statistics on the number of inhabitants of the State and its counties, classified by urban and rural residence. In addition, figures are shown for each county subdivision, each incorporated place, and each unincorporated place of 1,000 or more.

The figures presented here are being issued in advance of their publication in Final Report Series PC(1)-A. The final report for this State will be issued within the next few months.

An outline of the 1970 census publication program can be obtained free of charge from the Bureau of the Census, Washington, D.C. 20233 or any U.S. Department of Commerce Field Office.

Urban and rural residence.—According to the definition adopted for use in the 1970 census, the urban population comprises all persons living in urbanized areas and in places of 2,500 inhabitants or more outside urbanized areas. More specifically, the urban population consists of all persons living in (a) places of 2,500 inhabitants or more incorporated as cities, villages, boroughs (except in Alaska), and towns (except in the New England States, New York, and Wisconsin), but excluding those persons living in the rural portions of extended cities (see "Urbanized areas," below); (b) unincorporated places of 2,500 inhabitants or more; and (c) other territory, incorporated or unincorporated, included in urbanized areas. The population not classified as urban constitutes the rural population.

Urbanized areas.—An urbanized area generally contains at least one city of 50,000 inhabitants or more and includes that portion of the surrounding territory, whether incorporated or unincorporated, which meets specified criteria relating to population density. There are a few urbanized areas which are based on "twin central cities" that have a combined population of at least 50,000. Some urbanized areas contain one or more incorporated places designated as "extended cities." These places are so designated because they have one or more large portions (normally at the boundary of the city) with relatively low population density. These portions are classified as rural and the residents are not included in the population of the urbanized area.

County subdivisions.—The Census Bureau presents statistics for subdivisions of counties, as follows:

- (a) By minor civil divisions in 28 States—Arkansas, Connecticut, Illinois, Indiana, Iowa, Kansas, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Nebraska, Nevada, New Hampshire, New Jersey, New York, North Carolina, Ohio, Pennsylvania, Rhode Island, South Dakota, Vermont, Virginia, West Virginia, and Wisconsin.
- (b) By census county divisions in 21 States—Alabama, Arizona, California, Colorado, Delaware, Florida, Georgia, Hawaii, Idaho, Kentucky, Montana, New Mexico, North Dakota, Oklahoma, Oregon, South Carolina, Tennessee, Texas, Utah, Washington, and Wyoming.
- (c) In Alaska, by boroughs and reservations for those census divisions (the county equivalent) which are so subdivided.

Minor civil divisions (townships, districts, etc.) are the primary political divisions into which counties are

subdivided. In some States, incorporated places are minor civil divisions in their own right. In other States they are subordinate to the minor civil division in which they are located, or the pattern is mixed—some incorporated places are independent minor civil divisions and others are subordinate to the minor civil division.

Census county divisions represent community areas which have been defined in recent decades by the Census Bureau with the cooperation of the Governors and State and local officials. These areas have physical features (roads, streams, etc.) as boundaries or follow the limits of incorporated places. The census county divisions in these States have replaced a variety of minor civil divisions which were unsatisfactory for statistical purposes principally because their boundaries frequently changed, were imaginary lines, or were not well known by many of the inhabitants.

Incorporated places.—Political units recognized as incorporated places in the reports of the census are those which are incorporated as cities, boroughs, towns, and villages, with the following exceptions: (a) boroughs in Alaska, and (b) towns in the New England States, New York, and Wisconsin. For extended cities (see "Urbanized areas" above), the data in table 2 refer to all of the population residing within the corporate limits of the city. For these cities, table 3 shows the urban and rural parts separately; comparable 1960 data are not available because this concept was not used prior to 1970.

Unincorporated places.—As in the 1950 and 1960 censuses, the Bureau has delineated boundaries for closely settled population centers without corporate limits. All such places of 1,000 inhabitants or more are shown in tables 2 and 3, and are identified with the letter "U."

Boundary changes.—The boundaries of some of the areas shown in this report may have changed between 1960 and 1970. The 1960 figures given here have generally not been adjusted for such changes. Specific information on the changes will be presented in the Series PC(1)-A final report for this State.

Percents and symbols.—Percents which round to less than 0.1 are shown as zero. A dash "-" signifies zero. Three dots "..." mean not applicable. Minus sign preceding a figure denotes decrease. The symbol "NA" means not available, and "U" means that the place is unincorporated. In table 3, an asterisk "*" denotes an incorporated place under 2,500 located in an urbanized area.

1970 CENSUS OF POPULATION

September 1970

U.S. DEPARTMENT OF COMMERCE / Bureau of the Census

PC(V 1)-32

NEW JERSEY

advance report

Final Population Counts

(The figures in this report supersede the preliminary counts for the same areas published in the PC(P1), PC(P2), and PC(P3) series of reports. The present series consists of 52 reports—number 1 for the United States and numbers 2 through 52 for the States and the District of Columbia in alphabetical order rather than in order of publication.)

The official population count of the State as of April 1, 1970, was 7,168,164. This represents an increase of 1,101,382, or 18.2 percent, from the 6,066,782 inhabitants of the State in 1960.

This report presents final 1970 census statistics on the number of inhabitants of the State and its counties, classified by urban and rural residence. In addition, figures are shown for each county subdivision, each incorporated place, and each unincorporated place of 1,000 or more.

The figures presented here are being issued in advance of their publication in Final Report Series PC(1)-A. The final report for this State will be issued within the next few months.

An outline of the 1970 census publication program can be obtained free of charge from the Bureau of the Census, Washington, D.C. 20233 or any U.S. Department of Commerce Field Office.

Urban and rural residence.—According to the definition adopted for use in the 1970 census, the urban population comprises all persons living in urbanized areas and in places of 2,500 inhabitants or more outside urbanized areas. More specifically, the urban population consists of all persons living in (a) places of 2,500 inhabitants or more incorporated as cities, villages, boroughs (except in Alaska), and towns (except in the New England States, New York, and Wisconsin), but excluding those persons living in the rural portions of extended cities (see "Urbanized areas," below); (b) unincorporated places of 2,500 inhabitants or more; and (c) other territory, incorporated or unincorporated, included in urbanized areas. The population not classified as urban constitutes the rural population.

Urbanized areas.—An urbanized area generally contains at least one city of 50,000 inhabitants or more and includes that portion of the surrounding territory, whether incorporated or unincorporated, which meets specified criteria relating to population density. There are a few urbanized areas which are based on "twin central cities" that have a combined population of at least 50,000. Some urbanized areas contain one or more incorporated places designated as "extended cities." These places are so designated because they have one or more large portions (normally at the boundary of the city) with relatively low population density. These portions are classified as rural and the residents are not included in the population of the urbanized area.

County subdivisions.—The Census Bureau presents statistics for subdivisions of counties, as follows:

- (a) By minor civil divisions in 28 States—Arkansas, Connecticut, Illinois, Indiana, Iowa, Kansas, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Nebraska, Nevada, New Hampshire, New Jersey, New York, North Carolina, Ohio, Pennsylvania, Rhode Island, South Dakota, Vermont, Virginia, West Virginia, and Wisconsin.
- (b) By census county divisions in 21 States—Alabama, Arizona, California, Colorado, Delaware, Florida, Georgia, Hawaii, Idaho, Kentucky, Montana, New Mexico, North Dakota, Oklahoma, Oregon, South Carolina, Tennessee, Texas, Utah, Washington, and Wyoming.
- (c) In Alaska, by boroughs and reservations for those census divisions (the county equivalent) which are so subdivided.

Minor civil divisions (townships, districts, etc.) are the primary political divisions into which counties are

subdivided. In some States, incorporated places are minor civil divisions in their own right. In other States they are subordinate to the minor civil division in which they are located, or the pattern is mixed—some incorporated places are independent minor civil divisions and others are subordinate to the minor civil division.

Census county divisions represent community areas which have been defined in recent decades by the Census Bureau with the cooperation of the Governors and State and local officials. These areas have physical features (roads, streams, etc.) as boundaries or follow the limits of incorporated places. The census county divisions in these States have replaced a variety of minor civil divisions which were unsatisfactory for statistical purposes principally because their boundaries frequently changed, were imaginary lines, or were not well known by many of the inhabitants.

Incorporated places.—Political units recognized as incorporated places in the reports of the census are those which are incorporated as cities, boroughs, towns, and villages, with the following exceptions: (a) boroughs in Alaska, and (b) towns in the New England States, New York, and Wisconsin. For extended cities (see "Urbanized areas" above), the data in table 2 refer to all of the population residing within the corporate limits of the city. For these cities, table 3 shows the urban and rural parts separately; comparable 1960 data are not available because this concept was not used prior to 1970.

Unincorporated places.—As in the 1950 and 1960 censuses, the Bureau has delineated boundaries for closely settled population centers without corporate limits. All such places of 1,000 inhabitants or more are shown in tables 2 and 3, and are identified with the letter "U."

Boundary changes.—The boundaries of some of the areas shown in this report may have changed between 1960 and 1970. The 1960 figures given here have generally not been adjusted for such changes. Specific information on the changes will be presented in the Series PC(1)-A final report for this State.

Percents and symbols.—Percents which round to less than 0.1 are shown as zero. A dash "-" signifies zero. Three dots "..." mean not applicable. Minus sign preceding a figure denotes decrease. The symbol "NA" means not available, and "U" means that the place is unincorporated. In table 3, an asterisk "*" denotes an incorporated place under 2,500 located in an urbanized area.

1970 CENSUS OF POPULATION

ber 1970

U.S. DEPARTMENT OF COMMERCE / Bureau of the Census

PC(V1)-33

see revised copy

NEW MEXICO

advance report

Final Population Counts

(The figures in this report supersede the preliminary counts for the same areas published in the PC(P1), PC(P2), and PC(P3) series of reports. The present series consists of 52 reports—number 1 for the United States and numbers 2 through 52 for the States and the District of Columbia in alphabetical order rather than in order of publication.)

The official population count of the State as of April 1, 1970, was 1,014,979. This represents an increase of 63,956, or 6.7 percent, from the 951,023 inhabitants of the State in 1960.

This report presents final 1970 census statistics on the number of inhabitants of the State and its counties, classified by urban and rural residence. In addition, figures are shown for each county subdivision, each incorporated place, and each unincorporated place of 1,000 or more.

The figures presented here are being issued in advance of their publication in Final Report Series PC(1)-A. The final report for this State will be issued within the next few months.

An outline of the 1970 census publication program can be obtained free of charge from the Bureau of the Census, Washington, D.C. 20233 or any U.S. Department of Commerce Field Office.

Urban and rural residence.—According to the definition adopted for use in the 1970 census, the urban population comprises all persons living in urbanized areas and in places of 2,500 inhabitants or more outside urbanized areas. More specifically, the urban population consists of all persons living in (a) places of 2,500 inhabitants or more incorporated as cities, villages, boroughs (except in Alaska), and towns (except in the New England States, New York, and Wisconsin), but excluding those persons living in the rural portions of extended cities (see "Urbanized areas," below); (b) unincorporated places of 2,500 inhabitants or more; and (c) other territory, incorporated or unincorporated, included in urbanized areas. The population not classified as urban constitutes the rural population.

Urbanized areas.—An urbanized area generally contains at least one city of 50,000 inhabitants or more and includes that portion of the surrounding territory, whether incorporated or unincorporated, which meets specified criteria relating to population density. There are a few urbanized areas which are based on "twin central cities" that have a combined population of at least 50,000. Some urbanized areas contain one or more incorporated places designated as "extended cities." These places are so designated because they have one or more large portions (normally at the boundary of the city) with relatively low population density. These portions are classified as rural and the residents are not included in the population of the urbanized area.

County subdivisions.—The Census Bureau presents statistics for subdivisions of counties, as follows:

- (a) By minor civil divisions in 28 States—Arkansas, Connecticut, Illinois, Indiana, Iowa, Kansas, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Nebraska, Nevada, New Hampshire, New Jersey, New York, North Carolina, Ohio, Pennsylvania, Rhode Island, South Dakota, Vermont, Virginia, West Virginia, and Wisconsin.
- (b) By census county divisions in 21 States—Alabama, Arizona, California, Colorado, Delaware, Florida, Georgia, Hawaii, Idaho, Kentucky, Montana, New Mexico, North Dakota, Oklahoma, Oregon, South Carolina, Tennessee, Texas, Utah, Washington, and Wyoming.
- (c) In Alaska, by boroughs and reservations for those census divisions (the county equivalent) which are so subdivided.

Minor civil divisions (townships, districts, etc.) are the primary political divisions into which counties are

subdivided. In some States, incorporated places are minor civil divisions in their own right. In other States they are subordinate to the minor civil division in which they are located, or the pattern is mixed—some incorporated places are independent minor civil divisions and others are subordinate to the minor civil division.

Census county divisions represent community areas which have been defined in recent decades by the Census Bureau with the cooperation of the Governors and State and local officials. These areas have physical features (roads, streams, etc.) as boundaries or follow the limits of incorporated places. The census county divisions in these States have replaced a variety of minor civil divisions which were unsatisfactory for statistical purposes principally because their boundaries frequently changed, were imaginary lines, or were not well known by many of the inhabitants.

Incorporated places.—Political units recognized as incorporated places in the reports of the census are those which are incorporated as cities, boroughs, towns, and villages, with the following exceptions: (a) boroughs in Alaska, and (b) towns in the New England States, New York, and Wisconsin. For extended cities (see "Urbanized areas" above), the data in table 2 refer to all of the population residing within the corporate limits of the city. For these cities, table 3 shows the urban and rural parts separately; comparable 1960 data are not available because this concept was not used prior to 1970.

Unincorporated places.—As in the 1950 and 1960 censuses, the Bureau has delineated boundaries for closely settled population centers without corporate limits. All such places of 1,000 inhabitants or more are shown in tables 2 and 3, and are identified with the letter "U."

Boundary changes.—The boundaries of some of the areas shown in this report may have changed between 1960 and 1970. The 1960 figures given here have generally not been adjusted for such changes. Specific information on the changes will be presented in the Series PC(1)-A final report for this State.

Percents and symbols.—Percents which round to less than 0.1 are shown as zero. A dash "-" signifies zero. Three dots "..." mean not applicable. Minus sign preceding a figure denotes decrease. The symbol "NA" means not available, and "U" means that the place is unincorporated. In table 3, an asterisk "*" denotes an incorporated place under 2,500 located in an urbanized area.

advance report

Final Population Counts

(The figures in this report supersede the preliminary counts for the same areas published in the PC(P1), PC(P2), and PC(P3) series of reports. The present series consists of 52 reports—number 1 for the United States and numbers 2 through 52 for the States and the District of Columbia in alphabetical order rather than in order of publication.)

The official population count of the State as of April 1, 1970, was 1,016,000. This represents an increase of 64,977, or 6.8 percent, from the 951,023 inhabitants of the State in 1960.

This report presents final 1970 census statistics on the number of inhabitants of the State and its counties, classified by urban and rural residence. In addition, figures are shown for each county subdivision, each incorporated place, and each unincorporated place of 1,000 or more.

The figures presented here are being issued in advance of their publication in Final Report Series PC(1)-A. The final report for this State will be issued within the next few months.

An outline of the 1970 census publication program can be obtained free of charge from the Bureau of the Census, Washington, D.C. 20233 or any U.S. Department of Commerce Field Office.

Urban and rural residence.—According to the definition adopted for use in the 1970 census, the urban population comprises all persons living in urbanized areas and in places of 2,500 inhabitants or more outside urbanized areas. More specifically, the urban population consists of all persons living in (a) places of 2,500 inhabitants or more incorporated as cities, villages, boroughs (except in Alaska), and towns (except in the New England States, New York, and Wisconsin), but excluding those persons living in the rural portions of extended cities (see "Urbanized areas," below); (b) unincorporated places of 2,500 inhabitants or more; and (c) other territory, incorporated or unincorporated, included in urbanized areas. The population not classified as urban constitutes the rural population.

Urbanized areas.—An urbanized area generally contains at least one city of 50,000 inhabitants or more and includes that portion of the surrounding territory, whether incorporated or unincorporated, which meets specified criteria relating to population density. There are a few urbanized areas which are based on "twin central cities" that have a combined population of at least 50,000. Some urbanized areas contain one or more incorporated places designated as "extended cities." These places are so designated because they have one or more large portions (normally at the boundary of the city) with relatively low population density. These portions are classified as rural and the residents are not included in the population of the urbanized area.

County subdivisions.—The Census Bureau presents statistics for subdivisions of counties, as follows:

- (a) By minor civil divisions in 28 States—Arkansas, Connecticut, Illinois, Indiana, Iowa, Kansas, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Nebraska, Nevada, New Hampshire, New Jersey, New York, North Carolina, Ohio, Pennsylvania, Rhode Island, South Dakota, Vermont, Virginia, West Virginia, and Wisconsin.
- (b) By census county divisions in 21 States—Alabama, Arizona, California, Colorado, Delaware, Florida, Georgia, Hawaii, Idaho, Kentucky, Montana, New Mexico, North Dakota, Oklahoma, Oregon, South Carolina, Tennessee, Texas, Utah, Washington, and Wyoming.
- (c) In Alaska, by boroughs and reservations for those census divisions (the county equivalent) which are so subdivided.

Minor civil divisions (townships, districts, etc.) are the primary political divisions into which counties are

subdivided. In some States, incorporated places are minor civil divisions in their own right. In other States they are subordinate to the minor civil division in which they are located, or the pattern is mixed—some incorporated places are independent minor civil divisions and others are subordinate to the minor civil division.

Census county divisions represent community areas which have been defined in recent decades by the Census Bureau with the cooperation of the Governors and State and local officials. These areas have physical features (roads, streams, etc.) as boundaries or follow the limits of incorporated places. The census county divisions in these States have replaced a variety of minor civil divisions which were unsatisfactory for statistical purposes principally because their boundaries frequently changed, were imaginary lines, or were not well known by many of the inhabitants.

Incorporated places.—Political units recognized as incorporated places in the reports of the census are those which are incorporated as cities, boroughs, towns, and villages, with the following exceptions: (a) boroughs in Alaska, and (b) towns in the New England States, New York, and Wisconsin. For extended cities (see "Urbanized areas" above), the data in table 2 refer to all of the population residing within the corporate limits of the city. For these cities, table 3 shows the urban and rural parts separately; comparable 1960 data are not available because this concept was not used prior to 1970.

Unincorporated places.—As in the 1950 and 1960 censuses, the Bureau has delineated boundaries for closely settled population centers without corporate limits. All such places of 1,000 inhabitants or more are shown in tables 2 and 3, and are identified with the letter "U."

Boundary changes.—The boundaries of some of the areas shown in this report may have changed between 1960 and 1970. The 1960 figures given here have generally not been adjusted for such changes. Specific information on the changes will be presented in the Series PC(1)-A final report for this State.

Percents and symbols.—Percents which round to less than 0.1 are shown as zero. A dash "—" signifies zero. Three dots "..." mean not applicable. Minus sign preceding a figure denotes decrease. The symbol "NA" means not available, and "U" means that the place is unincorporated. In table 3, an asterisk "*" denotes an incorporated place under 2,500 located in an urbanized area.

Table 1. Population of Counties: 1970 and 1960

[For information on boundary changes and meaning of symbols, see text]

NOTE: This revised report contains corrected figures for the State as a whole, for Guadalupe and McKinley Counties and selected areas therein, and for Espanola city. In addition, the urban-rural distribution of Bernalillo County has been changed, Holloman (U) is recognized in Otero County, and the status designations (e.g., "city") for a number of incorporated places have been revised.

Table 2. Population of County Subdivisions: 1970 and 1960

[Total population of a place in two or more county subdivisions appears in table 3. County subdivision figures for 1960 do not necessarily add to county totals. For information on boundary changes and meaning of symbols, see text.]

1970 CENSUS OF POPULATION

JAN 12 1971
U.S. DEPARTMENT OF COMMERCE

January 1971

U.S. DEPARTMENT OF COMMERCE / Bureau of the Census

PC(V1)-34

NEW YORK

advance report

Final Population Counts

(The figures in this report supersede the preliminary counts for the same areas published in the PC(P1), PC(P2), and PC(P3) series of reports. The present series consists of 52 reports—number 1 for the United States and numbers 2 through 52 for the States and the District of Columbia in alphabetical order rather than in order of publication.)

The official population count of the State as of April 1, 1970, was 18,190,740. This represents an increase of 1,408,436, or 8.4 percent, from the 16,782,304 inhabitants of the State in 1960.

This report presents final 1970 census statistics on the number of inhabitants of the State and its counties, classified by urban and rural residence. In addition, figures are shown for each county subdivision, each incorporated place, and each unincorporated place of 1,000 or more.

The figures presented here are being issued in advance of their publication in Final Report Series PC(1)-A. The final report for this State will be issued within the next few months.

An outline of the 1970 census publication program can be obtained free of charge from the Bureau of the Census, Washington, D.C. 20233 or any U.S. Department of Commerce Field Office.

Urban and rural residence.—According to the definition adopted for use in the 1970 census, the urban population comprises all persons living in urbanized areas and in places of 2,500 inhabitants or more outside urbanized areas. More specifically, the urban population consists of all persons living in (a) places of 2,500 inhabitants or more incorporated as cities, villages, boroughs (except in Alaska), and towns (except in the New England States, New York, and Wisconsin), but excluding those persons living in the rural portions of extended cities (see "Urbanized areas," below); (b) unincorporated places of 2,500 inhabitants or more; and (c) other territory, incorporated or unincorporated, included in urbanized areas. The population not classified as urban constitutes the rural population.

Urbanized areas.—An urbanized area generally contains at least one city of 50,000 inhabitants or more and includes that portion of the surrounding territory, whether incorporated or unincorporated, which meets specified criteria relating to population density. There are a few urbanized areas which are based on "twin central cities" that have a combined population of at least 50,000. Some urbanized areas contain one or more incorporated places designated as "extended cities." These places are so designated because they have one or more large portions (normally at the boundary of the city) with relatively low population density. These portions are classified as rural and the residents are not included in the population of the urbanized area.

County subdivisions.—The Census Bureau presents statistics for subdivisions of counties, as follows:

- (a) By minor civil divisions in 28 States—Arkansas, Connecticut, Illinois, Indiana, Iowa, Kansas, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Nebraska, Nevada, New Hampshire, New Jersey, New York, North Carolina, Ohio, Pennsylvania, Rhode Island, South Dakota, Vermont, Virginia, West Virginia, and Wisconsin.
- (b) By census county divisions in 21 States—Alabama, Arizona, California, Colorado, Delaware, Florida, Georgia, Hawaii, Idaho, Kentucky, Montana, New Mexico, North Dakota, Oklahoma, Oregon, South Carolina, Tennessee, Texas, Utah, Washington, and Wyoming.
- (c) In Alaska, by boroughs and reservations for those census divisions (the county equivalent) which are so subdivided.

Minor civil divisions (townships, districts, etc.) are the primary political divisions into which counties are

subdivided. In some States, incorporated places are minor civil divisions in their own right. In other States they are subordinate to the minor civil division in which they are located, or the pattern is mixed—some incorporated places are independent minor civil divisions and others are subordinate to the minor civil division.

Census county divisions represent community areas which have been defined in recent decades by the Census Bureau with the cooperation of the Governors and State and local officials. These areas have physical features (roads, streams, etc.) as boundaries or follow the limits of incorporated places. The census county divisions in these States have replaced a variety of minor civil divisions which were unsatisfactory for statistical purposes principally because their boundaries frequently changed, were imaginary lines, or were not well known by many of the inhabitants.

Incorporated places.—Political units recognized as incorporated places in the reports of the census are those which are incorporated as cities, boroughs, towns, and villages, with the following exceptions: (a) boroughs in Alaska, and (b) towns in the New England States, New York, and Wisconsin. For extended cities (see "Urbanized areas" above), the data in table 2 refer to all of the population residing within the corporate limits of the city. For these cities, table 3 shows the urban and rural parts separately; comparable 1960 data are not available because this concept was not used prior to 1970.

Unincorporated places.—As in the 1950 and 1960 censuses, the Bureau has delineated boundaries for closely settled population centers without corporate limits. All such places of 1,000 inhabitants or more are shown in tables 2 and 3, and are identified with the letter "U."

Boundary changes.—The boundaries of some of the areas shown in this report may have changed between 1960 and 1970. The 1960 figures given here have generally not been adjusted for such changes. Specific information on the changes will be presented in the Series PC(1)-A final report for this State.

Percents and symbols.—Percents which round to less than 0.1 are shown as zero. A dash "-" signifies zero. Three dots "..." mean not applicable. Minus sign preceding a figure denotes decrease. The symbol "NA" means not available, and "U" means that the place is unincorporated. In table 3, an asterisk "*" denotes an incorporated place under 2,500 located in an urbanized area.

1970 CENSUS OF POPULATION

Number 1970

U.S. DEPARTMENT OF COMMERCE / Bureau of the Census

PC(V1)-35

NORTH CAROLINA

advance report

Final Population Counts

(The figures in this report supersede the preliminary counts for the same areas published in the PC(P1), PC(P2), and PC(P3) series of reports. The present series consists of 52 reports—number 1 for the United States and numbers 2 through 52 for the States and the District of Columbia in alphabetical order rather than in order of publication.)

The official population count of the State as of April 1, 1970, was 5,082,059. This represents an increase of 525,904, or 11.5 percent, from the 4,556,155 inhabitants of the State in 1960.

This report presents final 1970 census statistics on the number of inhabitants of the State and its counties, classified by urban and rural residence. In addition, figures are shown for each county subdivision, each incorporated place, and each unincorporated place of 1,000 or more.

The figures presented here are being issued in advance of their publication in Final Report Series PC(1)-A. The final report for this State will be issued within the next few months.

An outline of the 1970 census publication program can be obtained free of charge from the Bureau of the Census, Washington, D.C. 20233 or any U.S. Department of Commerce Field Office.

Urban and rural residence.—According to the definition adopted for use in the 1970 census, the urban population comprises all persons living in urbanized areas and in places of 2,500 inhabitants or more outside urbanized areas. More specifically, the urban population consists of all persons living in (a) places of 2,500 inhabitants or more incorporated as cities, villages, boroughs (except in Alaska), and towns (except in the New England States, New York, and Wisconsin), but excluding those persons living in the rural portions of extended cities (see "Urbanized areas," below); (b) unincorporated places of 2,500 inhabitants or more; and (c) other territory, incorporated or unincorporated, included in urbanized areas. The population not classified as urban constitutes the rural population.

Urbanized areas.—An urbanized area generally contains at least one city of 50,000 inhabitants or more and includes that portion of the surrounding territory, whether incorporated or unincorporated, which meets specified criteria relating to population density. There are a few urbanized areas which are based on "twin central cities" that have a combined population of at least 50,000. Some urbanized areas contain one or more incorporated places designated as "extended cities." These places are so designated because they have one or more large portions (normally at the boundary of the city) with relatively low population density. These portions are classified as rural and the residents are not included in the population of the urbanized area.

County subdivisions.—The Census Bureau presents statistics for subdivisions of counties, as follows:

- (a) By minor civil divisions in 28 States—Arkansas, Connecticut, Illinois, Indiana, Iowa, Kansas, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Nebraska, Nevada, New Hampshire, New Jersey, New York, North Carolina, Ohio, Pennsylvania, Rhode Island, South Dakota, Vermont, Virginia, West Virginia, and Wisconsin.
- (b) By census county divisions in 21 States—Alabama, Arizona, California, Colorado, Delaware, Florida, Georgia, Hawaii, Idaho, Kentucky, Montana, New Mexico, North Dakota, Oklahoma, Oregon, South Carolina, Tennessee, Texas, Utah, Washington, and Wyoming.
- (c) In Alaska, by boroughs and reservations for those census divisions (the county equivalent) which are so subdivided.

Minor civil divisions (townships, districts, etc.) are the primary political divisions into which counties are

subdivided. In some States, incorporated places are minor civil divisions in their own right. In other States they are subordinate to the minor civil division in which they are located, or the pattern is mixed—some incorporated places are independent minor civil divisions and others are subordinate to the minor civil division.

Census county divisions represent community areas which have been defined in recent decades by the Census Bureau with the cooperation of the Governors and State and local officials. These areas have physical features (roads, streams, etc.) as boundaries or follow the limits of incorporated places. The census county divisions in these States have replaced a variety of minor civil divisions which were unsatisfactory for statistical purposes principally because their boundaries frequently changed, were imaginary lines, or were not well known by many of the inhabitants.

Incorporated places.—Political units recognized as incorporated places in the reports of the census are those which are incorporated as cities, boroughs, towns, and villages, with the following exceptions: (a) boroughs in Alaska, and (b) towns in the New England States, New York, and Wisconsin. For extended cities (see "Urbanized areas" above), the data in table 2 refer to all of the population residing within the corporate limits of the city. For these cities, table 3 shows the urban and rural parts separately; comparable 1960 data are not available because this concept was not used prior to 1970.

Unincorporated places.—As in the 1950 and 1960 censuses, the Bureau has delineated boundaries for closely settled population centers without corporate limits. All such places of 1,000 inhabitants or more are shown in tables 2 and 3, and are identified with the letter "U."

Boundary changes.—The boundaries of some of the areas shown in this report may have changed between 1960 and 1970. The 1960 figures given here have generally not been adjusted for such changes. Specific information on the changes will be presented in the Series PC(1)-A final report for this State.

Percents and symbols.—Percents which round to less than 0.1 are shown as zero. A dash "—" signifies zero. Three dots "..." mean not applicable. Minus sign preceding a figure denotes decrease. The symbol "NA" means not available, and "U" means that the place is unincorporated. In table 3, an asterisk "*" denotes an incorporated place under 2,500 located in an urbanized area.

Table 1. Population of Counties: 1970 and 1960

[For information on boundary changes and meaning of symbols, see text]

U.S. DEPARTMENT OF COMMERCE / Bureau of the Census

PC(V1)-36

NORTH DAKOTA

advance report

Final Population Counts

(The figures in this report supersede the preliminary counts for the same areas published in the PC(P1), PC(P2), and PC(P3) series of reports. The present series consists of 52 reports—number 1 for the United States and numbers 2 through 52 for the States and the District of Columbia in alphabetical order rather than in order of publication.)

The official population count of the State as of April 1, 1970, was 617,761. This represents a decrease of 14,685, or 2.3 percent, from the 632,446 inhabitants of the State in 1960.

This report presents final 1970 census statistics on the number of inhabitants of the State and its counties, classified by urban and rural residence. In addition, figures are shown for each county subdivision, each incorporated place, and each unincorporated place of 1,000 or more.

The figures presented here are being issued in advance of their publication in Final Report Series PC(1)-A. The final report for this State will be issued within the next few months.

An outline of the 1970 census publication program can be obtained free of charge from the Bureau of the Census, Washington, D.C. 20233 or any U.S. Department of Commerce Field Office.

Urban and rural residence.—According to the definition adopted for use in the 1970 census, the urban population comprises all persons living in urbanized areas and in places of 2,500 inhabitants or more outside urbanized areas. More specifically, the urban population consists of all persons living in (a) places of 2,500 inhabitants or more incorporated as cities, villages, boroughs (except in Alaska), and towns (except in the New England States, New York, and Wisconsin), but excluding those persons living in the rural portions of extended cities (see "Urbanized areas," below); (b) unincorporated places of 2,500 inhabitants or more; and (c) other territory, incorporated or unincorporated, included in urbanized areas. The population not classified as urban constitutes the rural population.

Urbanized areas.—An urbanized area generally contains at least one city of 50,000 inhabitants or more and includes that portion of the surrounding territory, whether incorporated or unincorporated, which meets specified criteria relating to population density. There are a few urbanized areas which are based on "twin central cities" that have a combined population of at least 50,000. Some urbanized areas contain one or more incorporated places designated as "extended cities." These places are so designated because they have one or more large portions (normally at the boundary of the city) with relatively low population density. These portions are classified as rural and the residents are not included in the population of the urbanized area.

County subdivisions.—The Census Bureau presents statistics for subdivisions of counties, as follows:

- (a) By minor civil divisions in 28 States—Arkansas, Connecticut, Illinois, Indiana, Iowa, Kansas, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Nebraska, Nevada, New Hampshire, New Jersey, New York, North Carolina, Ohio, Pennsylvania, Rhode Island, South Dakota, Vermont, Virginia, West Virginia, and Wisconsin.
- (b) By census county divisions in 21 States—Alabama, Arizona, California, Colorado, Delaware, Florida, Georgia, Hawaii, Idaho, Kentucky, Montana, New Mexico, North Dakota, Oklahoma, Oregon, South Carolina, Tennessee, Texas, Utah, Washington, and Wyoming.
- (c) In Alaska, by boroughs and reservations for those census divisions (the county equivalent) which are so subdivided.

Minor civil divisions (townships, districts, etc.) are the primary political divisions into which counties are

subdivided. In some States, incorporated places are minor civil divisions in their own right. In other States they are subordinate to the minor civil division in which they are located, or the pattern is mixed—some incorporated places are independent minor civil divisions and others are subordinate to the minor civil division.

Census county divisions represent community areas which have been defined in recent decades by the Census Bureau with the cooperation of the Governors and State and local officials. These areas have physical features (roads, streams, etc.) as boundaries or follow the limits of incorporated places. The census county divisions in these States have replaced a variety of minor civil divisions which were unsatisfactory for statistical purposes principally because their boundaries frequently changed, were imaginary lines, or were not well known by many of the inhabitants.

Incorporated places.—Political units recognized as incorporated places in the reports of the census are those which are incorporated as cities, boroughs, towns, and villages, with the following exceptions: (a) boroughs in Alaska, and (b) towns in the New England States, New York, and Wisconsin. For extended cities (see "Urbanized areas" above), the data in table 2 refer to all of the population residing within the corporate limits of the city. For these cities, table 3 shows the urban and rural parts separately; comparable 1960 data are not available because this concept was not used prior to 1970.

Unincorporated places.—As in the 1950 and 1960 censuses, the Bureau has delineated boundaries for closely settled population centers without corporate limits. All such places of 1,000 inhabitants or more are shown in tables 2 and 3, and are identified with the letter "U."

Boundary changes.—The boundaries of some of the areas shown in this report may have changed between 1960 and 1970. The 1960 figures given here have generally not been adjusted for such changes. Specific information on the changes will be presented in the Series PC(1)-A final report for this State.

Percents and symbols.—Percents which round to less than 0.1 are shown as zero. A dash "-" signifies zero. Three dots "..." mean not applicable. Minus sign preceding a figure denotes decrease. The symbol "NA" means not available, and "U" means that the place is unincorporated. In table 3, an asterisk "*" denotes an incorporated place under 2,500 located in an urbanized area.

Table 1. Population of Counties: 1970 and 1960

CENSUS OF POPULATION

BUREAU OF THE CENSUS

JAN 11 12 27 PM '71

LIBRARY

January 1971

U.S. DEPARTMENT OF COMMERCE / Bureau of the Census

PC(V1)-37

OHIO

advance report

Final Population Counts

(The figures in this report supersede the preliminary counts for the same areas published in the PC(P1), PC(P2), and PC(P3) series of reports. The present series consists of 52 reports—number 1 for the United States and numbers 2 through 52 for the States and the District of Columbia in alphabetical order rather than in order of publication.)

The official population count of the State as of April 1, 1970, was 10,652,017. This represents an increase of 945,620, or 9.7 percent, from the 9,706,397 inhabitants of the State in 1960.

This report presents final 1970 census statistics on the number of inhabitants of the State and its counties, classified by urban and rural residence. In addition, figures are shown for each county subdivision, each incorporated place, and each unincorporated place of 1,000 or more.

The figures presented here are being issued in advance of their publication in Final Report Series PC(1)-A. The final report for this State will be issued within the next few months.

An outline of the 1970 census publication program can be obtained free of charge from the Bureau of the Census, Washington, D.C. 20233 or any U.S. Department of Commerce Field Office.

Urban and rural residence.—According to the definition adopted for use in the 1970 census, the urban population comprises all persons living in urbanized areas and in places of 2,500 inhabitants or more outside urbanized areas. More specifically, the urban population consists of all persons living in (a) places of 2,500 inhabitants or more incorporated as cities, villages, boroughs (except in Alaska), and towns (except in the New England States, New York, and Wisconsin), but excluding those persons living in the rural portions of extended cities (see "Urbanized areas," below); (b) unincorporated places of 2,500 inhabitants or more; and (c) other territory, incorporated or unincorporated, included in urbanized areas. The population not classified as urban constitutes the rural population.

Urbanized areas.—An urbanized area generally contains at least one city of 50,000 inhabitants or more and includes that portion of the surrounding territory, whether incorporated or unincorporated, which meets specified criteria relating to population density. There are a few urbanized areas which are based on "twin central cities" that have a combined population of at least 50,000. Some urbanized areas contain one or more incorporated places designated as "extended cities." These places are so designated because they have one or more large portions (normally at the boundary of the city) with relatively low population density. These portions are classified as rural and the residents are not included in the population of the urbanized area.

County subdivisions.—The Census Bureau presents statistics for subdivisions of counties, as follows:

- (a) By minor civil divisions in 28 States—Arkansas, Connecticut, Illinois, Indiana, Iowa, Kansas, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Nebraska, Nevada, New Hampshire, New Jersey, New York, North Carolina, Ohio, Pennsylvania, Rhode Island, South Dakota, Vermont, Virginia, West Virginia, and Wisconsin.
- (b) By census county divisions in 21 States—Alabama, Arizona, California, Colorado, Delaware, Florida, Georgia, Hawaii, Idaho, Kentucky, Montana, New Mexico, North Dakota, Oklahoma, Oregon, South Carolina, Tennessee, Texas, Utah, Washington, and Wyoming.
- (c) In Alaska, by boroughs and reservations for those census divisions (the county equivalent) which are so subdivided.

Minor civil divisions (townships, districts, etc.) are the primary political divisions into which counties are

subdivided. In some States, incorporated places are minor civil divisions in their own right. In other States they are subordinate to the minor civil division in which they are located, or the pattern is mixed—some incorporated places are independent minor civil divisions and others are subordinate to the minor civil division.

Census county divisions represent community areas which have been defined in recent decades by the Census Bureau with the cooperation of the Governors and State and local officials. These areas have physical features (roads, streams, etc.) as boundaries or follow the limits of incorporated places. The census county divisions in these States have replaced a variety of minor civil divisions which were unsatisfactory for statistical purposes principally because their boundaries frequently changed, were imaginary lines, or were not well known by many of the inhabitants.

Incorporated places.—Political units recognized as incorporated places in the reports of the census are those which are incorporated as cities, boroughs, towns, and villages, with the following exceptions: (a) boroughs in Alaska, and (b) towns in the New England States, New York, and Wisconsin. For extended cities (see "Urbanized areas" above), the data in table 2 refer to all of the population residing within the corporate limits of the city. For these cities, table 3 shows the urban and rural parts separately; comparable 1960 data are not available because this concept was not used prior to 1970.

Unincorporated places.—As in the 1950 and 1960 censuses, the Bureau has delineated boundaries for closely settled population centers without corporate limits. All such places of 1,000 inhabitants or more are shown in tables 2 and 3, and are identified with the letter "U."

Boundary changes.—The boundaries of some of the areas shown in this report may have changed between 1960 and 1970. The 1960 figures given here have generally not been adjusted for such changes. Specific information on the changes will be presented in the Series PC(1)-A final report for this State.

Percents and symbols.—Percents which round to less than 0.1 are shown as zero. A dash "-" signifies zero. Three dots "..." mean not applicable. Minus sign preceding a figure denotes decrease. The symbol "NA" means not available, and "U" means that the place is unincorporated. In table 3, an asterisk "*" denotes an incorporated place under 2,500 located in an urbanized area.

Table 1. Population of Counties: 1970 and 1960
