

Accident in Sanborn Yard.

Sanborn Enterprise: The Branch t. ain backed through a switch just before it reached its stub at the east end of the depot last Saturday night and was partially derailed close to the main track. At the same time a stock train started to pull out from the depot on the main line and came in contact with the smoker of the Branch train tipping it at a sharp angle, though not completely turning it on its side. Both trains were moving slowly, otherwise the accident might have been more serious. Two men, occupants of the smoker, were slightly hurt and their injuries were dressed by Dr. Lang, resident N. P. surgeon. Traffic was held up at this point for two or three hours while the tracks were being cleared. No. 8 was held at Eckelson and passed 135 at this station.

Pioneer Banker is Dead.

Sanborn Enterprise: Maynard Crane was called to Washington, D. C. Dec. 3rd, by the death of his brother-in-law, J. M. Burrell.

Mr. Burrell will be remembered by "old timers" as the cashier of the Barnes County Bank, of Lenham & Kiser, the pioneer bank of Sanborn. He was one of the owners of the townships of Cooperstown and Dazey, and in connection with the Lenhams of Sanborn, R. C. Cooper, of Cooperstown, C. A. Roberts of Fargo, promoted the building of the S.

C. & F. M. R. R. to Cooperstown in 1883.

In 1882 Mr. Burrell came to this section of the Northwest from Pennsylvania. In the late eighties he moved to Alabama and there followed his real vocation which was that of mining engineer. Later he went to Washington, D. C., and at the time of his death was a wholesaler of coal.

There are many persons yet residing in Barnes and Griggs counties who knew the genial "Murray" who was the life and push at Gun Club meetings of the early days and a prime factor in the business development of those years of hardship and stress.

Mr. Burrell is survived by a widow and three children all living in Washington, D. C.

Try It.

Tie a string about a yard long to a common door key and take the string in the right hand, holding it so the key would clear the floor four or five inches. If you can hold the string steady enough the key will begin to swing back and forth in a straight line. Let another person take your left hand in his and the motion of the key will change from the pendulum-like swing to a circular swing. If a third person will place his hand on the shoulder of the second person the key will stop. Try it and then explain if you can.
