

Aneta May Install Water and Sewers

Civil Engineers Atkinson and Hall of Devils Lake and Bismarck have presented to the city of Aneta a complete set of plans for a water and sewer system, which could be installed for about \$80,000. The engineers made accurate surveys of the best water supplies, the best outlet for the sewer and plans for extensions to both that might be required in the future. A sample of water secured from test holes was sent to the Agricultural college and was pronounced to be the best in this part of the state.

A mass meeting will be called on February 5 at which time a full explanation of the costs and advantages of the systems proposed will be made to all who wish to be present.
