

## Peter Arlien Loses Leg.

Pekin Budget. Peter Arlien of Bergen township has been taking treatments for several months at different institutions, for an ailment of the knee, and for several weeks he has been taking treatment at the Mc-Ville hospital. He has appeared to be getting better, and hopes have been entertained that he would get well and save the foot, but Monday of this week it became necessary to amputate the right leg above the knee. He withstood the shock of the operation, and it is hoped he will recover. His many friends sympathize with him in his heavy trial. Tuberculosis of the bone set in which made amputation necessary.
