

Sentinel-Courier: Complaint has been made and a warrant issued against Frank Arndt, of near Jessie, for violating diphtheria quarantine regulations. Edward Arndt, who had diphtheria some weeks ago, still has the germ in his throat and is therefore a dangerous carrier of the disease. Cultures made from throat swabs are still found positive by the Fargo state laboratories. Contrary to orders given by Dr. Truscott, of Binford, acting under the directions of County Board of Health, members of the Arndt family, including Edward, went to Jessie to do some shopping. The Supt. of the Board of Health, Dr. Westley, was notified and an order for the arrest was made Tuesday. As Mr. Arndt is at present affected by rheumatism, the hearing will be postponed.
