

The above etching will give one an idea of how the new plant of the Thompson Yards will look when comnieted. Work on the new plant has been

All the concrete foundastarted. tions are in and part of the frame work on the south warehouse has been erected.

The shipment of heavy dimensions his caused a little delay, but as soon as it arrives here it is expected that the work will be pushed as rapidly as possible.

The new plant will be built on practically the same plans as other new plants owned by Thompson Yards in many of the larger cities in this and other states. Their principal idea is to have all of the stock under cover and the warehouses are so situated that the waste of time in loading and unloading the stock has been reduced to a minimum, and the work can be accom-

plished with greater efficiency. The two lumber sheds are 32x180 .cet. The front of the middle building has been reserved for office rooms, in which will be installed the atest fixtures, furnace, and other The south modern conveniences. warehouse will have a driveway the

In erecting this new plant to replace the old land mark, Thompson Yards is expressing their public spiritedness and testifying their faith in the future of Binford and this "Famous for Sercommunity. vice" is no mere catch line advertising phrase with them. They mean it and when their plant is completed they will be in position to emphasize this fact more and more.

This story would not be complete without a mention of their local salesmanager, Herman Osen. It is partly thru Mr. Osen's efforts that this new plant is to be built. Herman is a hustler from the ground up and is so theroughly inbued with the Thompson spirit and their method of doing business that he dreams and talks "no dickering-one price to all," The entire plant will be built on famous for service, etc."
