

## Another Call for Skilled Men.

Another "want column," this time for the obtaining of men for the engineer's corps, has been received by the Griggs county draft board from Adj. Gen. G. A. Frazier.

The new list will operate on the same basis as the want column, men now required for the current draft call being permitted to list themselves for service in special lines. Then, in the event that there is need for such men, they will be called up; otherwise they remain in the draft in the same relative position as before, the registration not affecting their status in any manner.

Under the new skilled workmen class, men may register for the following: auto repairmen, axemen, blacksmiths, boatmen, bridge carpenters, cabinet makers, caulkers, concrete foremen, concrete workers, construction foremen, cooks, draftsmen, electricians, gas enginemen, stationary enginemen, farriers, horse shoers, lithographers, machinists, buglers, photographers, plumbers, powdermen, quarry men, riggers, saddlers, shoemakers, surveyors, tailors, teamsters, telephone operators, timbermen and topographers.

"Local boards must understand that these registrants are not to be inducted until orders are received as to allotments, and that no men needed to fill the July calls already announced shall be permitted to volunteer," says Adjutant General Fraser. "Volunteers for this service shall not be released to the navy or marine corps or withdraw their applications prior to August 1."
