

Draft Examinations Stopped.

By order of Adjutant General Frazer, local draft boards will conduct no further physical examinations of registrants until new instructions and regulations regarding physical examinations are received from General Crowder.

Business is fast accumulating in the offices of the district board and it is believed that when local boards have completed their work the district board will have 45,000 questionnaires to go over.

Under order just promulgated all married men since May 18, 1917, and who have been included in deferred classifications are to be placed in class one in order that uniform action may be taken in all of these cases by the district board. The order it is estimated, will effect at least 2,500 newlyweds in North Dakota.

Dressed poultry can now be had at
