set aside in the Flickertail state. Throughout the nation 21,350,000 school children will perform the pa-trictic task of tagging the shovels in American homes. These tags will be on their face the inscription;

Save that Shovelful of Coal a Day for Uncle Sam," while on the reverse are printed six simple hints for the saying of coal; the economic and reasonable use of heat, and economy in

the consumption of gas and electric light. "Tag Your Shovel day" falls on Wednesday, and it is expected that falls on governors, mayors and teachers will unite in arranging for a school holi-

day—one of the few special national school holidays ever proclaimed. Two great printing plants are now turning out the tags and posters, and it may be taken for granted that all the children everywhere except those

who are unfortunate enough to be down with measies or mumps or with measles or mumps something will be on the job Jan. 30, for Uncle Sam. Fuel Administrator Baker points to this tag day as different from all

other tag days." Instead of asking for cash contributions, the school children will demand that householders save money—save money for erty bonds and at the same time Liberty bonds are a coal pile. erom theo to shectus noiling A than ever were taken out of the

ground in this country in a single year, were mined and delivered in 1917. Another million carloads were needed, but no human power could make so sudden an increase in production, where the bare physical requirements were on so vast a scale. But the necessities of the war can-

not wait, and the American people must face a typical American problem, meeting and satisfying an unheard increase in demand for coal with inadequate facilities for creating increased supply.
