Pekin Budget: The light proposition for Pekin is being solved by the people working harmoniously together. Saturday evening a mass meeting of the citizens of Pekin was called at the Fire hall, and after a short session it was decided to make application to the village board to call a special election to vote bonds for which to buy and install an electric plant for the town adequate for its needs, said plant to be a town owned institution. Legal advice on this was decided to be sought at once and no time will be lost to get the proposed measure carried through. It is expected that the new plant will be in working shape before the first of April, 1919.
