

Hi, Skinny, the Rink is Finished

The finishing touches are being put to the skating rink on the railway right-of-way. This week a water superintendent of the railroad company has been here, assisting the American Legion boys with the project, and in a day or two the entire space will be covered with water—and then—business at the hardware stores and shoe shop should be brisk for quite a spell.

Our citizens owe much to the Legion members for sponsoring this most worthy movement for the benefit of the children—of course the older folks will enjoy it too—and also to the railroad company for their generosity, without which the venture could not have been accomplished.

From now on the skating rink will become the most popular spot in town.
