

PUBLIC SCHOOL NOTES

The open winter has made it possible to carry on all the Physical Education out of doors. We have been very fortunate in being able to do this because justice cannot be done to this form of training indoors where facilities and room is limited. This is the first time within the memory of the high school students that the same games can be carried on out of doors in mid-winter that are ordinarily carried on in the fall.

Last Friday the students were subjected to physical inspection. The results were satisfactory as a large percentage of the students were found to be in good physical condition. Teachers in the grades also report pupils in good condition. Nevertheless, there are a few who need attention, especially to their teeth. A few need to have their tonsils removed. These should be corrected in the near future so as to prevent further ailments which cause a great deal of grief, worry and expense.

No classes were held on Friday as the day was used in all departments to conduct the physical inspection. Students had sufficient time in which to prepare their work for Monday's recitations.

Pupils in the grades having an average of 90 per cent or over are:
