

# New Unit Bought

The village board has made contract with the Fairbanks-Morse Co. for the new unit to be installed in the light plant. A representative of the company was in Binford Friday and closed the deal for a 15 horse power engine and 10 k. w. generator to replace the Cushman outfit.

Blue prints of the new unit will be received in a few days, when work will be commenced on the bases so by the time the equipment reaches here it will be ready for installation. Probably two or three weeks will elapse before the new unit will be in operation.

The terms call for a payment of \$750 and interest on Nov. 1, 1923, and one for a like amount on Nov. 1, 1924.
