

BRANCH TRAIN TO RUN TO VALLEY CITY SOON

Sentinel-Courier: Efforts on the part of commercial interests of Valley City have, evidently, finally won the desired results and the passenger service over this Sanborn-Cooperstown-McHenry branch will have Valley City instead of Sanborn as its south terminal. According to semi-official reports the change will be made on May 1st when the branch train will leave Valley City in the morning and return to that point via Sanborn in the evening.

According to the best reports available there will be a slight change in the schedule of the train going south in the afternoon. This change as now reported would bring the train down the line about one hour earlier than at present.

Local N. P. officials are without official schedules regarding the change, but they are expected daily.

Valley City business men are counting the terminal change a huge victory that will win them greatly increased patronage from this branch line and they are planning a booster trip to be made over the branch on the day the first run is made from Valley City.
