

restored.

Fire broke out in the H. B. Hanson home last Saturday evening, and for a time it threw a scare into our citizens. When it was discovered, flames were shooting from the roof, but quick work in getting the chemicals in action soon got the fire under control. Considerable damage was done to that portion of the house in flames, and also to the furniture and clothing. The fire was caused by a defective chimney and occurred while the family was visiting with neighbors.
