

years is apparently a thing of the past, and according to plans outlined at the meeting Wimbledon will have an independent team of mostly home players. Dazey, Courtenay and several other towns will also have independent teams this year and Manager Huggins is already booking games.

Floyd Leseman who wore the bird cage here for the past four years is gone, but arrangements will be made to procure a suitable catcher. It is likely that Maurice Wickham, who with Charley Hunt constituted our pitching staff last year, will be with us again, and the local material has been augmented by the addition of R. J. Kupka and R. C. Riddick. With the restrictions of the league removed it will also be legitimate to take in the neighbors and it is reported that E. Peterson of Rogers and Chas. Haffner of Sutton have a desire to wear a Wimbledon uniform this season. It would appear, therefore at this stage of development the prospects are fairly promising so far as playing material is concerned. Practice will begin as soon as the diamond is in shape.

TRY THIS ON YOUR NEW FORD

A Ford owner installed a new fangled carburetor that was guaranteed to save 20 per cent on fuel. Then he put in special spark plugs that were guaranteed to save another 20 per cent. He next put in a patented rear axle that was likewise guaranteed to save 20 per cent and finally put on high pressure "cords" that promised another 20 per cent saving. Now with a fuel economy of 120 per cent the owner has to stop every 100 miles or so to keep it from running over.

Binford citizens sometimes find in their mail a mysterious "chain letter," usually one containing a special prayer for happiness, or good luck, or something equally as foolish, and along with a threat that bad luck will pursue them if they don't write a similar letter to three of their acquaintances. In other words, they are threatened with things if they "break the chain." The nuisance has started up again in this country, and Uncle Sam has sent out warning to pay absolutely no attention to such letters. They usually spring from the mind of some thoughtless, irresponsible busybody who has not enough sense to know that unless the chain was broken there isn't enough men in the postal department to handle this class of foolish letters and nothing else. Don't be skeptical enough to give the "chain letter" a second thought. Drop it into the waste basket—and if you haven't a waste basket the kitchen stove will answer just as well.
