## SURVEYING ROAD

Surveyors are at work surveying the east and west road about 7 1-2 miles north of McHenry, connecting the Tiffany road leading to New Rockford, with the McHenry-Hamar road. This will be a government constructed road and it will be a good one when completed. It will make a much better road between McHenry and New Rockford. The road being surveyed runs east and west past the Fred Hensler farm. This will supply an outlet road for farmers in that neighborhood which will be a great relief to them. There has never been any roads in that section of the country ---McHenry Tribune.
