

Chief Game Warden E. T. Judd and Warden Brown, of this district, were in Binford yesterday on their way to Red Willow lake, where they released four air of Hungarian partridges. About 100 pairs of these birds were imported from Hungary, and placed on the state hatchery at Grafton, and from there have been distributed to points in North Dakota. They are about one year old and full grown. According to Mr. Judd, the birds do very well in the Northwest and multiply very rapidly.
