

Notice: Two members of the Binford Fire Department, J. J. Simons and D. F. Rice have been appointed by this department to make an inspection of all chimneys, smoke pipes, furnaces, stoves, and lead in wires to your lights, for the purpose of ascertaining if they are in good condition. These are the most common causes of fire if they are in poor condition. This work will be done free and we hope that you will give these men all the aid possible when they call at your place to make this inspection.—Binford Fire Dept.
