

Mr. Henry Schindele, whose sickness we announced in our last issue, was taken to the hospital at Valley City last Friday, his affliction developing into appendicitis, and he being removed to that place, for an operation. The operation was to have been performed yesterday, but we have not heard anything further at this time. We sincerely hope that the treatment will prove successful.

LATER—The operation was performed at about nine o'clock yesterday (Wednesday) forenoon, at this writing the patient is doing very well considering the seriousness of his case. No ill results are expected and it is thought he will soon be able to return home.
