

Dophin Goplen met with a painful accident last Thursday which necessitated medical assistance before he got through with it. He was driving to a water hole to fill a water tank, and the grade being steep at the turning off point, the wagon turned over, throwing Mr. Goplen in the opposite direction with the result that he struck his head against some part of the wagon inflicting a long cut in the top of his scalp. Dr. Truscott was at Cooperstown, he being a member of the Binford band which furnished music there during the celebration, and he was called home that night to attend to the wound, and Mr. Goplen is getting along nicely and is around attending to his various duties the same as tho nothing had happened.
