

Horse Killed.

Last Friday forenoon one of Barney Vogen's draymen was using a team and a slip scraper on the railroad well, one of the horses fell into the hole in the center that is about 20 feet deep and 4 feet square, and in the struggle that followed the scraper and the other horse fell in on top of the unfortunate creature. Death was almost instantaneous. Block and tackle was procured and the top horse was extricated from the hole with only a few bruises. The dead horse was pulled out and hauled away to the fields for burial.

Mr. Vogen was very much attached to the animal as it had been a most faithful servant to him. We sympathize with Barney in his loss.
