

farm this season.

Many matters of importance were brought up at the Commercial club meeting last evening, aside from the market day proposition which we have mentioned elsewhere. The secretary was instructed to communicate with the railroad officials for the purpose of securing a new stock yard. The present one has about served its usefulness. The plan is to secure one of three pens, a double deck loading chute, some sheds and a well. The club also took up the proposition of placing a bell in the school house. Otto Pritz was delegated to confer with the school board on this matter. A consignment of fish will be sent for to stock Red Willow and Long lake.
