

come.

Another road improvement day such as we had last year has been inaugurated by the Commercial club. Everyone who is capable of handling a pick or shovel is urged to take part. Monday, May 27th is the day set. You are to report in the morning at 7:30 o'clock and the routes will be laid out for you. Much good was done on the roads last year and it is expected that equally as much or more will be done this year.
