

A unique, but eminently practical method of raising money was successfully carried out by the members of the United Lutheran church of Binford. About 25 acres, the use of which was donated to the church, was broken up last spring and seeded to flax and a few days ago 300 bushels were threshed out. The flax has been stored in one of the elevators, and when sold will add approximately \$500 for contribution to the church fund. The work of breaking and seeding and harvesting was donated.
