

which they had to do.

A young son of Mr. and Mrs. O. A. Roningen met with a very painful accident last week while employed around his father's threshing rig. One of his thumbs was broken so that the bones were protruding thru the skin. He got his mitten caught on a key at the end of a shaft on the separator, and so quick did the accident happen that he had no chance to get his hand out of the mitten before the thumb was broken. He was brought to town and Dr. Truscott attended to the injured member.
