

out.

Two cases of fits or paralysis among children have been reported these last days. The first was one of the small boys of Gust Kling, just east of Pekin, who fell in a fit while out playing, last Saturday forenoon. Dr. Arneson was called and at the present writing the little fellow is doing very well, although it was thought for awhile that he could not live. Monday, little Lawrence Bue, son of Mr. and Mrs. O. C. Bue, fell into spasms and for a long while it was conceded that he could not live. Dr. Arneson was again called, and by evening the child was fairly over the ordeal. This little fellow has had an attack of the same kind once before, about a year ago.—
