

## Griggs County Mutual is Growing.

Sentinel-Courier: The Griggs County Farmers' Mutual Fire and Lightning Insurance company, organized a few months ago, is a growing institution, and it is expected that the insurance in force Sept. 5, will be in \$100,000 which is the goal the promoters have set for that date.

The insurance in force leaped from \$10,000 to \$90,000 in three weeks and last week the company sustained its first loss. A steer owned by Glen Boltz was struck and killed by lightning, last Wednesday, and a satisfactory adjustment was made.

The Griggs County Mutual, although a young company, promises in the course of a few years to be one of the strongest mutuals in the state. It is a home institution, officered and directed by responsible home people, and should receive enthusiastic support from Griggs county farmers.
