A real estate transaction of considerable importance was the sale of the hall and poolroom of Herman Hovel to Fred Rules of Oklahoma. Mr. Rules plans to take possession as soon as the present tenants can vacate. The new owner plans to make some necessary improvements and will give one or more movies each week. They will fit up living apartments in the building. Barber Fred Claus has as yet made no definite plans as to his future.

One of our young farmers had occasion to motor up to a nice home near Pekin on a recent Sunday and as is but natural left for his home early Monday morning. Going up in the daylight was of course an easy matter but returning was another story. He, being full of happiness, took the wrong road and in a moment of abstraction found himself and car nicely planted in a soft spot, large enough for both front and rear wheels. After trying to induce several of the farmers near to leave their comfortable beds and help him out, he retraced his many footsteps and finally reached Binford where the drayman took pity on him, as well of a few silver dollars, and pulled him out. He says he walked in all about 10 miles and from his general appearance it is not thought that he made any miscalculation at all. It's all in the game.

Luke McLuke Says

A single man knows that there are Ten Commandments. But a married man knows that there are about ten thousand of them.

Another reason why daughter can't peel the potatoes for mother is because she is so tender hearted that she just can't bear to gouge the eyes out of the poor things.

A man can find a whole lot of excuses for taking a drink when he wants one. But he can't think of a single excuse for going without a drink when he wants one.

Mother's idea of economy is to use ten cents worth of sugar and ten cents worth of butter and ten cents worth of eggs in converting one cent's worth of stale bread into a pudding that nobody will eat.

A sweet disposition may be a good thing. But it doesn't help a mule driver much in his line of work.

It is none of our business. But a girl who has a pair of props that are built on the plan of a pair of ice tongs should wear an opaque petticoat under a thin white waist.

We are very fond of summer. The redeeming feature of cold weather is that it compels the girls to cover their liver-colored elbows.

And parents are not the only animals that talk too much without furnishing a satisfactory excuse.

The Humane society takes care of other animals, but married men have to protect themselves.

The bride who has a three room flat always puts on dog when referring to her "apartment" and speaks of her kitchen as her "breakfast room."

When a man quits smoking he imagines that he should issue hourly bulletins informing the world of his progress.

The most curious thing in the world is a woman who isn't.

DUCKLINGS NEED FRESH AIR

Sometimes Well to Open Door of Incubator a Trifle to Permit Them to Breathe.

Ducklings, when hatched in an incubator sometimes need more fresh air in the machine than chicks do and when the hatch is complete and the little ducklings are still in the machine getting strong before being taken out, it is well to open the door a little, say one-eighth of an inch, to let in more fresh air for them to breathe. This, of course, applies to a good hatch, not where there are only a few ducklings in the machine.
