A letter received from the commercial club of New Rockford is authority for the rumor that the post office department is about to discontinue the mail service on the local passenger trains between Fargo and Minot, and handle all the mail on the fast trains. The club urges that there be a general protest against this action. It is argued that as the mail from places like Sutton would have to be taken on with mail cranes, which is a very destructive practice, especially to packages and the like. Besides it would handicap all correspondence between the smaller towns. The saving of discontinuing the service would be only about \$3000 per year, a very small amount, considering the inconvenience it would create.—Sutton Reporter.
