

# The Hope Hospital

---

For a number of years the people of Hope have recognized the necessity of a hospital but until this spring the undertaking seemed to be too great to undertake it. Last year, however, Dr. Philip fitted up several rooms over his office for the convenience of out-of-town patients and from this seemingly small beginning has been evolved the Hope Hospital, the pride of the city and the boon of the suffering and afflicted.

The institution is situated on the corner of third street and Hubbard Ave., a beautiful location away from the noise and turmoil of the business streets. The building is a commodious two story frame structure with beautiful grounds surrounding it.

The interior is arranged in an up-to-date manner with the latest appliances and furniture for the convenience of the physicians and nurses and the comfort of the patients. The reception room, ward, private rooms and operating room are on the first floor, with additional rooms kitchen and dining room on the second floor.

Miss Crothers, a nurse of recognized ability and experience is in charge.

Dr. Philip is entitled to credit in promoting this enterprise and he should, and no doubt will, have the hearty co-operation of the citizens of the city in making it a success in every sense of the word.
