

There was no little excitement last Thursday evening when the clangor of the fire bell called out the department and it was announced that the Hope Roller Mill was on fire. The fire was caused by the large smoke stack burning out and setting fire to the weeds just south of the mill and near the flat house. The fire however was extinguished by the bucket brigade before the water was turned on. The fire department was on deck and before the fire was extinguished the boys had a string of hose from the fire hall to the mill and ready for the water.
