

Frank Howden met with a very painful accident Thursday of last week in which he sustained severe burns over his face and hands and can consider himself lucky that he escaped with his life. Ashes from his threshing engine set fire to the straw around the machine and instantly a big blaze was on threatening the destruction of the rig. Frank jumped onto the engine and went to pull out the separator which he succeeded in doing but in doing so burned himself very severely. We sincerely hope that he will soon recover and that his injuries will not be of a permanent character.
