### PIGS TOOK LIBERTIES.

Will Jensen the accommodating Great Northern station agent and his family have been enjoying camp life at Lake Hook this week and have entertained several guests, Mert Jensen of Cooperstown, N. D., and Miss Kate Austin among them. They also entertained a number of unwelcome guests. After their camp had been nicely made and every thing in shipshape the party all went out on the lake for a row and some fishing. They were gone from camp some time. On their return they found to their dismay that a drove of Will Moffatt's pigs had broken out of their enclosure and had made themselves very much at home in the

Jensen camp. Squeals and grunts of delight and satisfaction were coming from the cook tent. The entire contents of Mrs. Jensen's lunch box had been rooted over and eaten by the hungry pigs. Nice fresh bread, pickles, pies, cakes, jellies, dishes, and cooking utensils were in a hopeless wreck. The gasoline stove had been tipped over and the gasoline spilled all over everything. Near by, in the sleeping tent a great porker with her litter of pigs was peacefully sleeping in Will's bed. There wasn't a thing eatable left, so Mert was dispatched with all possible haste to town to buy crackers and bologna to save the hungry campers from starvation.—Hutchinson Leader.

### Taken Up.

One red bull calf came to my place the latter part of May. Is from six to eight months old. Owner prove property, pay charges and take said calf away.

There's as much difference between freshly gathered, appetizing vegetables, and the best of canned goods, as there is between a shipped in apple and one picked ripe and mellow from the tree. My vegetables are home grown. They are crisp and nourishing. The liberal use of them means more economical and more healthful living. Remember that I fill orders Monday, Wednesday & Saturday each week.
