

PUBLIC SCHOOL
HOPE, N.D.

The PIONEER presents this week a cut of Hope's new public school building which is about completed. It has durability combined with neatness in its plans and a more up-to-date school edifice will not be found in the state. The rooms are large, well lighted and have perfect ventilation. The board of education is to be congratulated on the splendid plans secured and on giving Hope so good an educational institution. The total cost will be in the neighborhood of \$18,000. The institution within itself is not sufficient to make a good school but we are indeed fortunate in having a first-class corps of teachers and parents sending their children to the Hope school this year may be assured of giving them as good advantages as can be found in any high school in the state of North Dakota. : : : : :
