

# Let The War Cry BE "Two-Thirds For Hope November 3rd."

The time is fast approaching when the people of this county will be called upon to vote on the question of moving the county seat and to decide by their vote where the county seat will be located, whether or not it will be moved to a town on the railroad or whether it will remain at Sherbrooke. We do not believe there is a man in the county but what would like to see the county seat in some good, live, progressive town on a railroad. There is no questioning the fact that the county is sadly in need of more commodious buildings to house the county officials and protect the county records, etc., and for a county that is out of debt and has nearly \$4,000,000 of assessed valuation, this cry of additional great expense of building a new home is all rot. The present court house is not only a disgrace to the county but a libel on the fair name of this great commonwealth of which Steele county is a part. Come, Voters and Tax-

payers, wake up, this is of vital interest to us all. If, by your vote, you fail to move the county seat this fall it will remain where it is for the next ten years—remember what we say—it will remain where it is for the next ten years. Let the war cry be "Two-thirds for Hope November 3rd" The town with more people than all the balance of the towns in the county combined; the best schools; the best churches; \$20,000 Electric light plant; miles of cement sidewalks and graded streets; more beautiful homes and many other advantages over other towns in the county; one thousand live men, women and children all working for a Greater Hope. Come, join us, and by your vote this fall place the county seat at Hope, the town that does things. Let the war cry be "Two-thirds for Hope November 3rd" and by your vote more emphatically express it and you will never regret your action.
