The electric plant has gone on the bum and it is probable that the company will have to shut down entirely for several days or until such time as they get the other plant in operation. This condition of affairs has been coming on all summer and the only criticism we have to offer is that the company should have done this work earlier in the season. The business men are handicapped by these conditions especially during the holiday trade when they need the lights more than at any time. However we hope the company will hustle this other plant to completion and that the business men will not be too hasty in their judgment. A lot of money has been invested in this plant and the company should be given a chance to make good.
