

Mrs. Herbert Church narrowly escaped very serious injury Monday afternoon caused by children jumping onto bobsleds. Mrs. Church was sitting on the rear seat of the sleigh and she and other members of the family were leaving town for home. Several young girls hopped onto the runners of the sleigh and in doing so grabbed the back of the rear seat tearing the seat from its fastenings and throwing Mrs. Church violently to the ground striking on her head and shoulders. She was picked up and carried to Mr. Purinton's office and medical aid summoned, Doctors Westley and Brimi responding immediately. It took some time for Mrs. Church to come to and it was feared that her injuries were serious, however we are happy to state that while she received a hard shock from the fall she will entirely recover in a few days. This practice of children jumping onto bobs is also dangerous to the children and should be stopped.
