

Serious Accident.

Herbert Mitchell, who has been employed at the tow mill in this city, met with a very painful and severe accident while at work last Friday as a result of which he loses one finger entirely of his right hand, part of another and had his arm badly torn. He was reaching over the machine to get out some tow which had clogged the machine and in some manner got his hand caught in the machinery and only the quick action of his brother, who was also working in the building, in stopping the machinery, saved him from more serious injury. The accident is bad enough as it is. Dr. Almklov dressed the hand and Herbert is getting along all right.
