

Hans Skel shot himself through the hand recently with a 22 caliber revolver. Dr. Almklov dressed the wound and his hand is getting along nicely. He was toying with the revolver and just before the accident happened he was told to be careful and he answered that he was always very careful and had no sooner got the words out of his mouth than the gun went off and he had a hole through his hand. It seems to us that there is an awful lot of carelessness in handling fire arms. There have been a dozen or more accidents the past three years and some deaths resulting from carelessness in handling fire arms.
