

Stringer Gets A Patent.

Wm. L. Stringer has been granted a patent on his improved hame tug and received the papers from the commissioner of patents last Friday.

The improvement is a good one and Mr. Stringer has already received numerous letters of inquiry. He will take out a patent in Canada and perhaps several other foreign countries. The patent is No. 787.-229. We hope that he will make a few thousand dollars out of it. He has several other contrivances in mind that he may have patented.
