

B. N. Stone, of LaMoure, was an over Sunday visitor in Cooperstown. He had been down to Minneapolis and Rochester with his brother, county treasurer F. J. Stone. We are very sorry to state that the condition of our much respected county treasurer is not very encouraging. We are informed that he has cancer which is very serious as he cannot be operated upon to afford relief. At the present time he is taking what is called a serum cure for cancer in an hospital at Minneapolis and it will be about four weeks before the physician in charge can tell whether the treatment will do any good. His friends here and throughout the county hope that his treatment will be successful.
