

---

—Why would it not be a good plan for the Grand Army post of Steele county to apply for arms and ammunition from the government? We are at present in no immediate danger from the Indians, but it would be well to be on the safe side, as the Devils Lake Indians are only about sixty miles from us. The arms might be procured at once and every able bodied man in the place drill with the rest and learn to use the weapons effectively. Let the matter be looked to immediately.
