
—The school entertainment on last Saturday evening was not so largely attended as it should have been, but the performance of the program was a decided success. The recitations were excellent, the music, both vocal and instrumental, was first class, and the debate had been carefull and exhaustively prepared by the participants. The subject, "Resolved; That in the cause of the late Indian war the government and its officials were more at fault than the Indians," was decided in favor of the negative. Both sides brought up strong arguments, however. The reading, "Dakota Weather," was very amusing and was well rendered by Harry Carpenter. The essay prepared by Miss Georgia Baker is worthy of especial notice. The subject, "Strange people and their strange ways," was handled in a most masterly manner, and was intensely interesting. The net proceeds of the entertainment amounted to \$18.55.
