

Harry Baker has had quite a large force at work all week laying new crossings and sidewalks. The old crossing in front of the Venable building has been taken up and a new one put in at the intersection of Second street and Steele avenue; the one in front of Milligan's billiard saloon has been moved to the intersection of Steele avenue and Third street. A new walk has been laid along Steele avenue to the Methodist church and the walk on Third street extended to the Congregational church. This will make it convenient to get to any part of town in bad weather.
