
—The commissioners decided at their last meeting not to offer a bounty for the destruction of gophers, but they will buy \$75 worth of strychnine to be distributed for the purpose of poisoning the little pests. We are of the opinion that the poison judiciously administered will have as good if not better effect in working their destruction than the paying of a bounty, and then the poison route is not so expensive. We believe the majority of the taxpayers will be pleased with the decision of the commissioners in this matter.
