

The school board has under consideration the erection of a brick school building in the village of Courtenay. The present school building has been outgrown and by another year additional room will have to be provided and it is a question between adding on to the present building or disposing of this building and erecting a new one. The matter will probably be submitted to the tax payers of the district, and it would be well for each individual to inform himself on the subject in order that he may vote intelligently when the time comes.
