
N. D. Man Killed

Jamestown, N. D., June 6.—

Word has been received from Tacoma that Joe Moody, former lineman and resident of Jamestown was recently killed at Tacoma by a live wire. Moody was well known to many here and to old time railroad men generally as he was with the N. P. several years. A letter from the west also states that Harry Hockacker, formerly of this city, and an engineer on the N. P. has just left the hospital where he was successfully treated for the removal of a tape worm, twenty-five feet in length, the physician being Dr. Sifton.
